

12 HAZARD TO LIFE

12.1 Introduction

- 12.1.1 According to the EIA Study Brief, hazard assessment shall be carried out if there is overnight storage of explosive on site and the storage is in close proximity to populated areas. Since no overnight storage of explosive on site is required for the construction of the Project, the hazard assessment is deemed not necessary.
- 12.1.2 Should overnight storage of explosive or setting up of explosives magazine is required for the construction of the project, it will need to go through a new EIA study.
