PHOTOMONTAGES 7A AND 7B - VIEWPOINT 19 (WESTERN HARBOUR CROSSING TOLL PLAZA)

Notes: These photomontages are for illustration purpose only, and do not necessarily reflect the final appearance of the WKCD facilities, as individual facilities will be subject to design comparison and/or development by others. All marine facilities such as the possible piers and possible art portions are subject to the requirements under Protection of Harbour Ordinance (Cap.531) and agreement with Harbourfront Commission. Design of the terrace gardens would be subject to the future architectural design, but as they serve as public openness, they will be freely and universally accessible by the general public. The locations for roof top gardens, green roofs, wind turbines and solar panels are also indicative only and will be subject to the changes during detailed design stage.
