Note:

Commonness: C = Common (AFCD Biodiversity Database 2012); **Leung (1999) and Vance (1999), *** Lai et al., 2006
***ARUP (2009)

Recorded Location: SW = Sham Wat, HHW = Hau Hok Wan, SSW = San Shek Wan, ST = San Tau, TC = Tung Chung, PM = Pak Mong, TH = Tai Ho

Conservation status: RC = Regional concern, LC = Local concern (Fellowes et al., 2002)

CSRL: EN = Endangered, VU = vulnerable, NT = Near Threatened, LC = Least Concern

IUCN: EN = Endangered, VU = Vulnerable, NT = Near Threatened, LC = Least Concern, DD = Data Deficient.

IUCN status including Data Deficient and Least Concern were presented if available to illustrate the species' global situation but species with these two status were not considered to be of conservation importance.
