Habitat: AL = ash lagoon, GS = grassland/shrubland, OR = orchard, P = plantation, SW = seawall, S = Watercourse, UD = urbanised/disturbed, W = woodland

Commonness: CW = common and widespread, CL = common/uncommon and localized, R = uncommon/rare and localized

Level of concern: LC = local concern; RC = regional concern; PRC = potential regional concern; GC = global concern. Letters in parentheses indicate that the assessment is based on restrictedness in breeding and/or roosting sites rather than in general occurrence (Fellowes *et al.* 2002)
