

Legend

-  Proposed Helipad (The Project)
-  Proposed Flight Sector for Helicopter Approaching/Departure

Note:

1. The indicated flight sector (radius 519.4m) for helicopter approaching/departure is determined based on the flight profile under mitigated scenario. Details shall refer to Section 4 of the EIA report.
2. Within the flight sector, helicopter will be operated at a height up to 300ft (91.44m) above the level of Proposed Helipad (i.e. 299.4 to 390.8mPD) during approaching/departure.
3. Outside the flight sector, the helicopter will be operated at a height of 1500ft above mean sea level under flyover/cruise mode.

Environmental Impact Assessment for A Rooftop Helipad at the Proposed New Block at Queen Mary Hospital
