1. <u>INTRODUCTION</u>	1-1
1.1 Project Background	1-1
1.2 EIA Study Brief	1-2
1.3 Objectives of the EIA Study	1-2
1.4 Organisation of the Report	1-3
2. <u>PROJECT DESCRIPTION</u>	2-1
2.1 General Description of the Project	2-1
2.2 Designated Project	2-3
2.3 Construction Activities	2-3
2.4 Scope of Works during Operational Phase	2-4
2.5 Construction Programme	2-4
2.6 Concurrent Projects and Evaluation of Potential Cumulative Impacts	2-5
2.7 Public Consultation	2-7
2.8 References	2-7
3. <u>CONSIDERATION OF ALTERNATIVES</u>	3-1
3.1 Need of the Project	3-1
3.2 Environmental Benefits	3-2
3.3 Consideration of “Without Project” Alternative	3-3
3.4 Consideration of Alternative Design and Layout	3-3
3.5 Construction Related Aspects	3-6
3.6 Consideration of Alternative Construction Methods and Sequences of Works	3-6
4. <u>AIR QUALITY IMPACT ASSESSMENT</u>	4-1
4.1 Introduction	4-1
4.2 Statutory Requirements and Evaluation Criteria	4-1
4.3 Study Area	4-1
4.4 Identification of Air Sensitive Receivers	4-2
4.5 Existing Air Quality	4-2
4.6 Evaluation of Impacts during Construction Phase	4-4
4.7 Evaluation of Impacts during Operation Phase	4-5
4.8 Mitigation Measures	4-6
4.9 Potential for Cumulative Impacts	4-7
4.10 Residual Impacts	4-8
4.11 Monitoring and Audit Requirements	4-8
4.12 Conclusion	4-8
4.13 References	4-9
