Notes:

Relative Abundance:

+++ = High Abundance, plants common in the habitat; ++ = Medium Abundance, plants occasionally occur in the habitat; + = Low Abundance, plants uncommon in the habitat

Native to Hong Kong: Yes = Native species; No = Exotic species

Habit: T = Tree; S = Shrub / Sub-shrub; C = Climber / Vine; H = Herb; B = Bamboo

Protection & Conservation Status:

C96 = Listed under Cap. 96

C586 = Scheduled under Cap. 586

RP = Listed in AFCD's *Rare and Precious Plants of Hong Kong* (<http://www.herbarium.gov.hk/PublicationsPreface.aspx?BookNameId=1>)

I(NT) = ranked as Near Threatened under IUCN Red List

I(VU) = ranked as Vulnerable under IUCN Red List

I(CE) = ranked as Critically Endangered under IUCN Red List

RA = ranked as Rare species in *Hong Kong Vascular Plants: Distribution and Status*

VR = ranked as Very Rare species in *Hong Kong Vascular Plants: Distribution and Status*

VU = ranked as vulnerable orchid species in *The Wild Orchards of Hong Kong*

- = no particular status

Lagerstroemia indica, *Lagerstroemia speciosa*, *Rhododendron pulchrum*, *Magnolia grandiflora*, *Michelia x alba*, *Michelia macclurei* identified in surveys are planted individuals of exotic origin for ornamental function.

Gnetum luofuense is very common and widespread in Hong Kong without any particular protection and conservation status. The near threatened (NT) status under IUCN Red List is also outside the Threatened Categories (which including Critically Endangered (CE), Endangered (EN) and Vulnerable (VU)) of the red list.

These species are not regarded as species of conservation interest in the EIA.
