Dear Fred,

Please be advised that there are three chimneys at the rooftop of Tower A of HKCH, which are connected to 3 boilers with 1 standby boiler. Towngas is now used as the primary fuel and diesel would only be the emergency backup fuel for the boilers. Please find the attachment for your information.

Thanks and Regards,
Kayi

Dear Kayi,

We refer to EPD advisory comments no. 9 for Section 3.6.5.4 in preceding email as highlighted.

Grateful if you can confirm for us for putting together the reply. This is for supplement on the SO2 impact assessment.

Please call if there are any questions. Thanks.

- Fred
