Dear Mr. Tsui,

Thanks for your information.

Apart from Chimneys EP1 – EP6, please could you confirm that the Emergency Generator (DG1)'s discharge location and its emission information are also remain unchanged ?

Thank you.

Dear Ms. AU YEUNG,

Please be informed that the chimney locations of the Diamond Hill Crematorium (DHC) remain unchanged.

In addition, the latest stack emission information of DHC was attached below for your reference:-

Lastly, please be reminded that the information above is provided for use to your consultancy study only.

Thank you.

Dear Mr. Tsui,

Thanks for your reply.

Please find attached the acceptance letter for our sub-consultancy service for the "NEW ACUTE HOSPITAL AT THE KAI TAK DEVELOPMENT AREA". And also the project location with Diamond Hill Crematorium as one of the major emission sources within 4km.

Please contact me if you have further questions.

Thanks

Subject: SP licence for Diamond Hill Crematorium

Dear Sirs,

We are Engineering Consultant called Meinhardt. We are working on the Environmental Impact Assessment (EIA) for Kai Tak New Acute Hospital Helipad. Since the Diamond Hill Crematorium is within our assessment area, we need to count in the air quality impact induced by the Crematorium's chimneys emission.

Attached is the "Specified Processes Licence" issued under Air Pollution Control Ordinance at 2006. It indicates all the emission information and chimney locations for Diamond Hill Crematorium.

Please can you confirm if these documents are the most updated? We need these information to put into the EIA report, and would like to obtain your confirmation whether these info are the most updated.

If you have any questions, please contact me at the undersigned.

Thanks very much.

Daisy Au Yeung

Subject: Specified Processes Licence for Ma Tau Kok Gas Works

Attention: This email is sent from an External source.

Dear Albert,

A Rooftop Helipad at New Acute Hospital at Kai Tak Development Area - Environmental Impact Assessment

We are the Environmental Consultant on behalf of our Client "Hospital Authority" to conduct the captioned assessment.

Our study area for air quality impact assessment is 4km radius from the proposed helipad. We found that Ma Tau Kok Gas Works (address: 100 tokwawan Road, Kowloon) located within our study area. As such, we obtained relevant document of the "Specified Processes Licence_L-8-004(5)" and emission information for Ma Tau Kok Gas Works from EPD Regional (E) Office.

In order to facilitate our study, it would be helpful if you could confirm us the attached document that is the most updated.

Attached please find the document and the appointment letter.

Thanks,
Joyce

Joyce WONG
