- Remarks:

 [1] The Works Area with length to width ratio exceeding 5:1 is divided into Subareas.

 [2] Works area which are completely out of 300m assessment area from the NSR is not considered in the assessment.

 [3] Includes a +3 dB(A) Façade Correction.

 [4] For the calculation of sound pressure levels (SPL), the PMEs are assumed to be placed at the notional source position according to the "Technical Memorandum on Noise from Construction Work other than Percussive Piling" by EPD.
