

Appendix 8.1 Plant Species Recorded within the 500m Assessment Area

Scientific name	Chinese name	Growth form	Origin	Rarity in Hong Kong ¹	Protection/Conservation status ^{2,3,4,5,6,7,8,9,10}	Relative abundance within the Project Site								Relative abundance outside the Project Site but within the Assessment Area														
						DW	MA	OR	PL	SG	DA	WA	WO	AL	CW	DW	FSW	MA	MU	OR	PL	RS	SS	SG	DA	WA	WO	
<i>Abelmoschus esculentus</i>	咖啡黃葵	Herb	Exotic	-	-									O														
<i>Abrus mollis</i>	毛相思子	Climber	Native	Restricted	-											S												
<i>Acacia auriculiformis</i>	耳果相思	Tree	Exotic	-	-				O	O	O							S		S	C			O	O	S	S	
<i>Acacia confusa</i>	台灣相思	Tree	Exotic	-	-					O				S		S					C			S	C		S	
<i>Acacia mangium</i>	大葉相思	Tree	Exotic	-	-				O												C							
<i>Acanthus ilicifolius</i>	老鼠筋	Shrub	Native	Common	-							O						C	S							O		
<i>Achyranthes aspera</i>	土牛膝	Herb	Native	Common	-						S	S				S		S							S			
<i>Acmella uliginosa</i>	沼生金鈕扣	Herb	-	-	-									O														
<i>Acronychia pedunculata</i>	山油柑	Tree	Native	Very common	-																						C	
<i>Acrostichum aureum</i>	鹵蕨	Herb	Native	Restricted	-													C							C			
<i>Adiantum flabellulatum</i>	扇葉鐵線蕨	Herb	Native	Very common	-				S	S			S				C										O	
<i>Aegiceras corniculatum</i>	蠟燭果，桐花樹	Shrub	Native	Common	-			O				S						C										
<i>Ageratum conyzoides</i>	藿香薊	Herb	Exotic	Common	-				S					O														
<i>Ageratum houstonianum</i>	熊耳草	Herb	Exotic	Common	-									O														
<i>Aglaia odorata</i> var. <i>microphyllina</i>	小葉米仔蘭	Shrub	Exotic	-	-															S								
<i>Ailanthus fordii</i>	常綠臭椿	Tree	Native	Rare	Threatened Species List of China's Higher Plants: Near Threatened ⁴ Cap. 96A ¹⁰				O																S			
<i>Alangium chinense</i>	八角楓	Tree	Native	Common	-				S				O				O							O			C	
<i>Albizia chinensis</i>	楹樹	Tree	Native	-	-																S							
<i>Albizia lebbek</i>	大葉合歡	Tree	Exotic	-	-				S												S			S				
<i>Alchornea trewioides</i>	紅背山麻桿	Shrub	Native	Common	-												S							S			S	
<i>Alocasia macrorrhizos</i>	海芋	Herb	native	Very common	-	S			S	S		S				C	O			O				C	C		S	
<i>Aloe vera</i>	蘆薈	Herb	Exotic	-	-							S		O														
<i>Alpinia hainanensis</i>	草豆蔻	Herb	native	Very common	-															S							S	
<i>Alpinia zerumbet</i>	豔山薑	Herb	native	Very common	-																S				S			
<i>Alpinia zerumbet</i> "Variegata"	花葉豔山薑	Herb	Exotic	-	-																			S				
<i>Alternanthera dentata</i> f. <i>rubiginosa</i>	紅龍莧	Herb	Exotic	-	-									S														
<i>Alternanthera sessilis</i>	蝦鉗菜	Herb	native	Common	-				S											O								
<i>Amaranthus viridis</i>	綠莧	Herb	native	Very common	-									O											O			
<i>Ampelopsis cantoniensis</i>	廣東蛇葡萄	Climber	native	Very common	-																						S	
<i>Ampelopsis heterophylla</i> var. <i>kulingensis</i>	牯嶺蛇葡萄	Climber	native	Common	-												S			S								
<i>Ananas comosus</i>	鳳梨	Herb	Exotic	-	-									O			O							S				
<i>Anisomeles indica</i>	廣防風	Herb	native	Common	-																			S				
<i>Annona squamosa</i>	番荔枝	Tree	Exotic	-	-																			S				
<i>Anredera cordifolia</i>	落葵薯	Climber	Exotic	Restricted	-									S													S	
<i>Apluda mutica</i>	水蔗草	Herb	Native	Very common	-						S													S				
<i>Aporosa dioica</i>	銀柴	Tree	Native	Very common	-				S	S	S	S		O				C				O		O	S		C

Notes:

- Corlett *et al.* (2000). Hong Kong Vascular Plants: Distribution and Status.
- IUCN (2021). IUCN Red List Version 2021-1.
- Convention on International Trade in Endangered Species of Wild Flora and Fauna (2020). Appendices I, II and III.
- Qin *et al.* (2017). Threatened Species List of China's Higher Plants.
- Fu & Chin (1992). China Plant Red Data Book – Rare and Endangered Plants.
- Wu & Hu (1988). Illustration of Rare & endangered plant in Guangdong Province.
- Hu *et al.* (2003). Rare and Precious Plants of Hong Kong.
- Cap. 586 Protection of Endangered Species of Animals and Plants Ordinance
- State Forestry Administration & Ministry of Agriculture (1999). List of Wild Plants under State Protection (Part 1).
- Cap. 96A Forestry Regulations under Cap. 96 Forests and Countryside Ordinance
 - Species in bold are considered of conservation importance.**
 - Lagerstroemia indica*, *Lagerstroemia speciosa*, *Michelia x alba*, *Oncidium flexuosum* and *Rhododendron sp.* are protected by Cap. 96A. However, all the recorded individuals were cultivated. In addition, these species are exotic to Hong Kong. Thus, they are not considered as species of conservation importance
 - Araucaria heterophylla*, *Casuarina equisetifolia*, *Dimocarpus longan*, *Lagerstroemia indica*, *Lagerstroemia speciosa*, *Litchi chinensis* and *Michelia x alba* are exotic to Hong Kong and not considered of conservation importance, despite being considered rare/ very rare by Corlett *et al.* (2000), listed as Vulnerable by IUCN (2019), listed as endangered or vulnerable in Threatened Species List of China's Higher Plants, listed as vulnerable in China Plant Red Data Book, listed under Category II in the List of Wild Plants under State Protection (Part 1), and/ or listed under Cap. 96 Forests and Countryside Ordinance.
 - Recorded individuals of *Araucaria heterophylla*, *Casuarina equisetifolia*, *Ficus altissima* and *Ocimum basilicum* are cultivated, in addition, all species except *Ficus altissima* are exotic. Thus, they are not considered as species of conservation importance despite being considered Vulnerable by IUCN (2021) or considered as rare/very rare by Corlett et al. (2000).
 - Dimocarpus longan* and *Litchi chinensis* are listed as Endangered/Vulnerable in Threatened Species List of China's Higher Plants, listed as Vulnerable in China Plant Red Data Book and listed under Category II in the List of Wild Plants under State Protection (Part 1). Both wild and cultivated individuals were encountered during survey. However, they are both exotic to Hong Kong and not protected by Hong Kong law. Thus, they are not considered as species of conservation importance.
 - Dalbergia* spp. are listed under Appendix II of CITES and protected under Cap. 586 Protection of Endangered Species of Animals and Plants Ordinance in Hong Kong as species in this genus is facing threat due to the overexploitation for its valuable wood (known as rosewood). In the current study, *Dalbergia assamica*, *Dalbergia benthamii* and *Dalbergia hancei* were recorded. *Dalbergia benthamii* and *Dalbergia hancei* are climber which is not relevant to the timber exploitation. In addition, these two species are very common in Hong Kong and considered as “common” by Corlett et al. (2000). Thus, they are not considered as species of conservation importance in the current Study. While *Dalbergia assamica* is tree and it is also considered as Endangered in Threatened Species List of China's Higher Plants (Qin *et al.* 2017), thus it is considered as a flora species of conservation importance. Individuals of *Dalbergia assamica* were recorded in the shrubland/grassland out outside the Project Site but within the assessment area.
 - Gymnanthera oblonga* is a very rare species according to Corlett *et. al.* (2000), due to the association with mangroves and coastal habitats locally. However, this species was also recorded in other localities according to Hong Kong Herbarium database and Flora of Hong Kong. Hence, it is not considered species of conservation importance in this study.

- *Ailanthus fordii* is considered as “Near Threatened” by the Threatened Species List of China's Higher Plants (Qin *et al.* 2017) and “Rare” by Corlett *et al.* (2000). Besides, it is protected under under Forestry Regulations (Cap. 96). As all the recorded individuals were found in man-made habitats, i.e. plantation and urbanized, and large amount of plantation species such as Eucalyptus spp. and *Acacia* spp. were found next to these individuals of *Ailanthus fordii*. Thus, all the recorded individuals of *Ailanthus fordii* are considered as cultivated individuals, and thus, this species is not considered as species of conservation importance in this Study.

Abbreviations:

- Habitats AL: agricultural land; CW: coastal water; DW: disturbed/ wasteland; FSW: fung shui wood; MA: mangrove; MU: mudflat; OR: orchard; PL: plantation; RS: rocky shore; SS: sandy shore; SG: shrubland/ grassland; DA: developed area; WA: watercourse; WO: woodland
- Relative abundance: C = Common; O = Occasional; S = Scarce
