

**Appendix 3.5 Weather Information from the Hong Kong Observatory (HKO)**

To estimate temperature and relative humidity around the assessment area, temperature and relative humidity from the Hong Kong Observatory's Tai Po Weather Station in 2020 are studied respectively

The minimum temperature and relative humidity is extracted to estimate the most polluting scenario in the EMFAC stimulation

\*Minimum temperature extracted = 6.2 deg.C  
 Minimum relative humidity extracted = 24%

Remarks:

\*A conservative input of 6 deg.C will be applied in EMFAC.

**Temperature**
