

Table 5.3a Number of Collared Crow Recorded during the Roosting Surveys

Survey Date	Total Number of Individuals	
	Pre-roost Locations	Final Roost
14 August 2020	86	107
25 August 2020	83	107
8 September 2020	54	104
22 September 2020	60	68
6 October 2020	114	0
20 October 2020	70	74
5 November 2020	53	89
19 November 2020	61	52
3 December 2020	49	59
16 December 2020	27	63
14 January 2021	26	34
28 January 2021	50	34

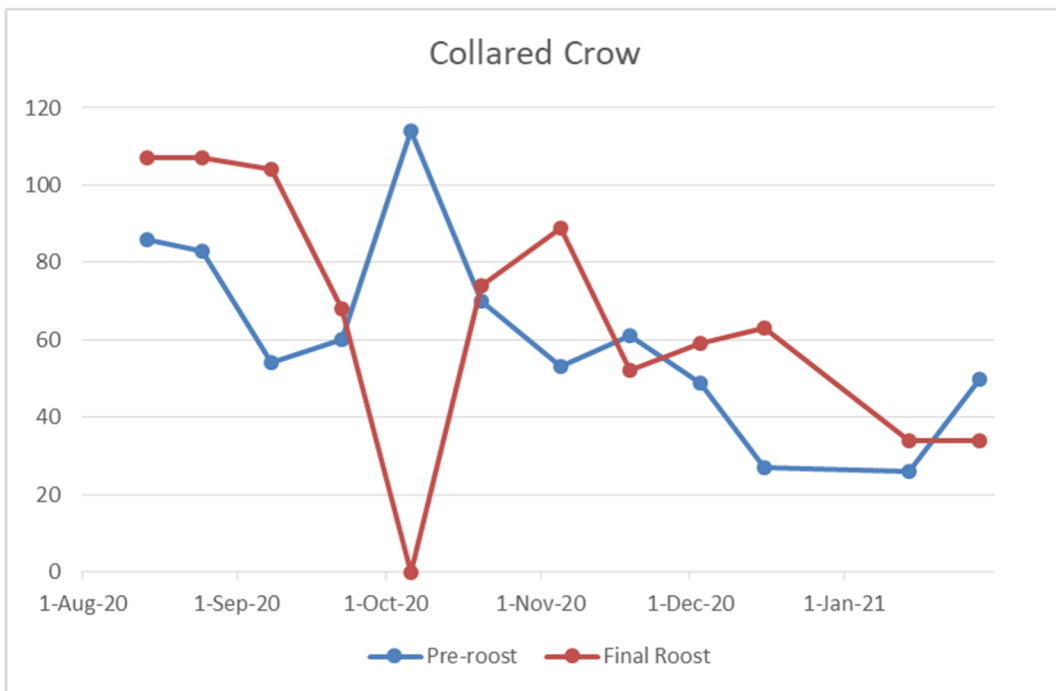

Table 5.3b Number of Black Kite Recorded during the Roosting Surveys

Survey Date	Total Number of Roosting Individuals
14 August 2020	6
25 August 2020	10
8 September 2020	40
22 September 2020	14
6 October 2020	3
20 October 2020	0
5 November 2020	0
19 November 2020	0
3 December 2020	0
16 December 2020	0
14 January 2021	0
28 January 2021	3

Table 5.3c Number of Ardeids Recorded during the Roosting Surveys

Survey Date	Total Number of Individuals	
	Ardeids departing from TPSTW	Occasional Roost (<i>Ficus</i> trees) ¹
14 August 2020	0	2
25 August 2020	0	0
8 September 2020	5	0
22 September 2020	27	0
6 October 2020	104	0
20 October 2020	114	0
28 October 2020 ²	0	136
5 November 2020	319	Uncertain ³
19 November 2020	40	0
3 December 2020	0	0
16 December 2020	28	0
14 January 2021	99	0
28 January 2021	3	0

Note:

1. Representative photos refer to Appendix 5.5
2. Incidental record of roosting ardeids outside the scheduled roosting surveys, i.e. during morning transect count.
3. 319 individuals of egrets were recorded landing on the *Ficus* trees after sunset; however, species of these egrets were unidentified and the number of individuals staying on the *Ficus* trees were uncertain due to insufficient light with most appearing to depart from TPSTW.
