Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Section	104B01-104B15

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Section: 104C01-104C20
Enclosure Involvec: 104P3
Road Located: 089
Vehicle EF Adopte: 104

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Section	104C01-104C20
Enclosure Involved	104P3
Road Located	089
Vehicle EF Adopted	104

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Section	104C01-104C20
Enclosure Involved	104P3
Road Located	089
Vehicle EF Adopted	104

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Section	104C01-104C20

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Section	104D01-104D20

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 54m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 36m and 1/3 of the total emission is dispersed in the remaining 18m

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Section	108A01-108A03
Enclosure Involved	108P1
Road Located	108
Vehicle EF Adopted	108

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 54m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 36m and 1/3 of the total emission is dispersed in the remaining 18m

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 54m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 36m and 1/3 of the total emission is dispersed in the remaining 18m

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Section	108A01-108A03
Enclosure Involved	108P1
Road Located	108

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 54m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 36m and 1/3 of the total emission is dispersed in the remaining 18m

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Section	108A01-108A03
Enclosure Involved	108P1
Road Located	108
Vehicle EF Adopted	108

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 54m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 36m and 1/3 of the total emission is dispersed in the remaining 18m

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 54m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 36m and 1/3 of the total emission is dispersed in the remaining 18m

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 54m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 36m and 1/3 of the total emission is dispersed in the remaining 18m

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 54m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 36m and 1/3 of the total emission is dispersed in the remaining 18m

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 54m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 36m and 1/3 of the total emission is dispersed in the remaining 18m

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 54m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 36m and 1/3 of the total emission is dispersed in the remaining 18m

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Section	109A01-109A05
Enclosure Involved	109P1
Road Located	109
Vehicle EF Adopted	109

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Section	109A01-109A05
Enclosure Involved	109P1
Road Located	109

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Section	109A01-109A05

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Section	109A01-109A05
Enclosure Involved	109P1
Road Located	109

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Section	109A01-109A05
Enclosure Involved	109P1
Road Located	109
Vehicle EF Adopted	109

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Section: 085A01-085A09
Enclosure Involved: 085P1
Road Located: 085
Vehicle EF Adopted: 085

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 65m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 15m

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Section: 085A01-085A09
Enclosure Involved: 085P1
Road Located: 085
Vehicle EF Adopted: 085

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 65m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 15m

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Section	085A01-085A09
Enclosure Involved	085P1
Road Located	085

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 65m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 15m

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Section	085A01-085A09
Enclosure Involved	085P1
Road Located	085

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 65m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 15m

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Section: 085A01-085A09
Enclosure Involvec: 085P1
Road Located: 085
Vehicle EF Adopte: 085

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 65m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 15m

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Section: 085A01-085A09
Enclosure Involvec: 085P1
Road Located: 085
Vehicle EF Adopte: 085

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 65m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 15m

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Section: 085A01-085A09
Enclosure Involved: 085P1
Road Located: 085
Vehicle EF Adopted: 085

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 65m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 15m

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 65m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 15m

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 65m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 15m

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 65m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 15m

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) A noise semi-enclosure (about 120m) is built between two noise enclosure. It was assumed that 2/3 of the total emission from the portal is dispersed in the first 60m box and 1/3 of the total emission is dispersed in the second 60m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) A noise semi-enclosure (about 120m) is built between two noise enclosure. It was assumed that 2/3 of the total emission from the portal is dispersed in the first 60m box and 1/3 of the total emission is dispersed in the second 60m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Section	085B01-085B31

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) A noise semi-enclosure (about 120m) is built between two noise enclosure. It was assumed that 2/3 of the total emission from the portal is dispersed in the first 60m box and 1/3 of the total emission is dispersed in the second 60m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) A noise semi-enclosure (about 120m) is built between two noise enclosure. It was assumed that 2/3 of the total emission from the portal is dispersed in the first 60m box and 1/3 of the total emission is dispersed in the second 60m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) A noise semi-enclosure (about 120m) is built between two noise enclosure. It was assumed that 2/3 of the total emission from the portal is dispersed in the first 60m box and 1/3 of the total emission is dispersed in the second 60m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Section	085B01-085B31
Enclosure Involved	085P2
Road Located	087

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) A noise semi-enclosure (about 120m) is built between two noise enclosure. It was assumed that 2/3 of the total emission from the portal is dispersed in the first 60m box and 1/3 of the total emission is dispersed in the second 60m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Section	085B01-085B31

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) A noise semi-enclosure (about 120m) is built between two noise enclosure. It was assumed that 2/3 of the total emission from the portal is dispersed in the first 60m box and 1/3 of the total emission is dispersed in the second 60m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Section	085B01-085B31

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) A noise semi-enclosure (about 120m) is built between two noise enclosure. It was assumed that 2/3 of the total emission from the portal is dispersed in the first 60m box and 1/3 of the total emission is dispersed in the second 60m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Section	085B01-085B31

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) A noise semi-enclosure (about 120m) is built between two noise enclosure. It was assumed that 2/3 of the total emission from the portal is dispersed in the first 60m box and 1/3 of the total emission is dispersed in the second 60m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Section	085B01-085B31

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) A noise semi-enclosure (about 120m) is built between two noise enclosure. It was assumed that 2/3 of the total emission from the portal is dispersed in the first 60m box and 1/3 of the total emission is dispersed in the second 60m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Section	085B01-085B31

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) A noise semi-enclosure (about 120m) is built between two noise enclosure. It was assumed that 2/3 of the total emission from the portal is dispersed in the first 60m box and 1/3 of the total emission is dispersed in the second 60m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Section	085B01-085B31

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) A noise semi-enclosure (about 120m) is built between two noise enclosure. It was assumed that 2/3 of the total emission from the portal is dispersed in the first 60m box and 1/3 of the total emission is dispersed in the second 60m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Section	085C01-085C13

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Section	085C01-085C13

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Section	085C01-085C13
Enclosure Involved	085P3
Road Located	088
Vehicle EF Adopted	085

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Section	085C01-085C13
Enclosure Involved	085P3
Road Located	088
Vehicle EF Adopted	085

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Section	085C01-085C13
Enclosure Involved	085P3
Road Located	088
Vehicle EF Adopted	085

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Section	085C01-085C13
Enclosure Involved	085P3
Road Located	088
Vehicle EF Adopted	085

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Section	085C01-085C13
Enclosure Involved	085P3
Road Located	088
Vehicle EF Adopted	085

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Section	085C01-085C13
Enclosure Involved	085P3
Road Located	088
Vehicle EF Adopted	085

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Section	086A01-086A09
Enclosure Involved	086P1
Road Located	086
Vehicle EF Adopted	086

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 65m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 15m

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 65m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 15m

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 65m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 15m

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Section	086A01-086A09
Enclosure Involved	086P1
Road Located	086

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 65m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 15m

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Section	086A01-086A09
Enclosure Involved	086P1
Road Located	086

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 65m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 15m

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Section	086A01-086A09
Enclosure Involved	086P1
Road Located	086
Vehicle EF Adopted	086

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 65m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 15m

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 65m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 15m

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Section	086A01-086A09
Enclosure Involved	086P1
Road Located	086
Vehicle EF Adopted	086

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 65m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 15m

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 65m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 15m

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 65m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 15m

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Section	086A01-086A09
Enclosure Involved	086P1
Road Located	086
Vehicle EF Adopted	086

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 65m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 15m

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Section	086A01-086A09
Enclosure Involved	086P1
Road Located	086

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 65m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 15m

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Section	086B01-086B15
Enclosure Involved	086P2
Road Located	086
Vehicle EF Adopted	086

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Section	086B01-086B15
Enclosure Involved	086P2
Road Located	086

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Section	086B01-086B15
Enclosure Involved	086P2
Road Located	086
Vehicle EF Adopted	086

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 80m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 30m

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Section	103A01-103A08
Enclosure Involvec	103P1
Road Located	103

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 80m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 30m

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 80m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 30m

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 80m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 30m

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Section	103A01-103A08
Enclosure Involvec	103P1
Road Located	103

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 80m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 30m

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 80m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 30m

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Section 103A01-103A08

Enclosure Involvec 103P1

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 80m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 30m

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 80m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 30m

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 80m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 30m

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 80m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 30m

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 80m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 30m

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 80m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 30m

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Section	104A01-104A08

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 80m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 30m

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 80m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 30m

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 80m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 30m

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Section: 104A01-104A08
Enclosure Involvec: 104P1
Road Located: 104
Vehicle EF Adopte: 104

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 80m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 30m

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 80m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 30m

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 80m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 30m

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 80m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 30m

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Section: 104A01-104A08
Enclosure Involvec: 104P1
Road Located: 104
Vehicle EF Adopte: 104

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 80m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 30m

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 80m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 30m

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 80m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 30m

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 80m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 30m

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Section	104B01-104B15
Enclosure Involved	104P2
Road Located	106
Vehicle EF Adopted	104

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Section	104B01-104B15
Enclosure Involved	104P2
Road Located	106
Vehicle EF Adopted	104

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Section: 104B01-104B15
Enclosure Involvec: 104P2
Road Located: 106
Vehicle EF Adopte: 104

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Section	104C01-104C20
Enclosure Involved	104P3
Road Located	089
Vehicle EF Adopted	104

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Section: 104C01-104C20
Enclosure Involved: 104P3
Road Located: 089
Vehicle EF Adopted: 104

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Section: 104C01-104C20
Enclosure Involvec: 104P3
Road Located: 089
Vehicle EF Adopte: 104

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Section 104D01-104D20
Enclosure Involvec 104P4
Road Located 123
Vehicle EF Adopte 104

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Section	104D01-104D20
Enclosure Involved	104P4
Road Located	123
Vehicle EF Adopted	104

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Section	104D01-104D20
Enclosure Involvec	104P4
Road Located	123
Vehicle EF Adopte	104

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 54m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 36m and 1/3 of the total emission is dispersed in the remaining 18m

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 54m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 36m and 1/3 of the total emission is dispersed in the remaining 18m

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 54m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 36m and 1/3 of the total emission is dispersed in the remaining 18m

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Section	108A01-108A03

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 54m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 36m and 1/3 of the total emission is dispersed in the remaining 18m

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 54m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 36m and 1/3 of the total emission is dispersed in the remaining 18m

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Section	108A01-108A03
Enclosure Involved	108P1
Road Located	108

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 54m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 36m and 1/3 of the total emission is dispersed in the remaining 18m

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Section	108A01-108A03
Enclosure Involved	108P1
Road Located	108
Vehicle EF Adopted	108

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 54m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 36m and 1/3 of the total emission is dispersed in the remaining 18m

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 54m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 36m and 1/3 of the total emission is dispersed in the remaining 18m

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Section	108A01-108A03
Enclosure Involved	108P1
Road Located	108
Vehicle EF Adopted	108

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 54m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 36m and 1/3 of the total emission is dispersed in the remaining 18m

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 54m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 36m and 1/3 of the total emission is dispersed in the remaining 18m

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 54m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 36m and 1/3 of the total emission is dispersed in the remaining 18m

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 54m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 36m and 1/3 of the total emission is dispersed in the remaining 18m

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Section	109A01-109A05
Enclosure Involved	109P1
Road Located	109
Vehicle EF Adopted	109

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Section	109A01-109A05
Enclosure Involved	109P1
Road Located	109
Vehicle EF Adopted	109

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Section	109A01-109A05
Enclosure Involvec	109P1
Road Located	109

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Section	109A01-109A05
Enclosure Involvec	109P1
Road Located	109

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Section: 085A01-085A09
Enclosure Involved: 085P1
Road Located: 085
Vehicle EF Adopted: 085

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 65m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 15m

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Section: 085A01-085A09
Enclosure Involved: 085P1
Road Located: 085
Vehicle EF Adopted: 085

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 65m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 15m

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Section: 085A01-085A09
Enclosure Involved: 085P1
Road Located: 085
Vehicle EF Adopted: 085

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 65m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 15m

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 65m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 15m

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 65m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 15m

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Section: 085A01-085A09
Enclosure Involved: 085P1
Road Located: 085
Vehicle EF Adopted: 085

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 65m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 15m

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Section: 085A01-085A09
Enclosure Involved: 085P1
Road Located: 085
Vehicle EF Adopted: 085

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 65m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 15m

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 65m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 15m

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Section: 085A01-085A09

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 65m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 15m

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Section	085A01-085A09
Enclosure Involved	085P1

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 65m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 15m

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 65m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 15m

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 65m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 15m

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Section	085B01-085B31
Enclosure Involved	085P2
Road Located	087

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) A noise semi-enclosure (about 120m) is built between two noise enclosure. It was assumed that 2/3 of the total emission from the portal is dispersed in the first 60m box and 1/3 of the total emission is dispersed in the second 60m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Section	085B01-085B31

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) A noise semi-enclosure (about 120m) is built between two noise enclosure. It was assumed that 2/3 of the total emission from the portal is dispersed in the first 60m box and 1/3 of the total emission is dispersed in the second 60m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Section	085B01-085B31

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) A noise semi-enclosure (about 120m) is built between two noise enclosure. It was assumed that 2/3 of the total emission from the portal is dispersed in the first 60m box and 1/3 of the total emission is dispersed in the second 60m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Section	085B01-085B31
Enclosure Involved	085P2
Road Located	087
Vehicle EF Adopted	085

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) A noise semi-enclosure (about 120m) is built between two noise enclosure. It was assumed that 2/3 of the total emission from the portal is dispersed in the first 60m box and 1/3 of the total emission is dispersed in the second 60m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Section	085B01-085B31

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) A noise semi-enclosure (about 120m) is built between two noise enclosure. It was assumed that 2/3 of the total emission from the portal is dispersed in the first 60m box and 1/3 of the total emission is dispersed in the second 60m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Section	085B01-085B31

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) A noise semi-enclosure (about 120m) is built between two noise enclosure. It was assumed that 2/3 of the total emission from the portal is dispersed in the first 60m box and 1/3 of the total emission is dispersed in the second 60m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Section	085B01-085B31

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) A noise semi-enclosure (about 120m) is built between two noise enclosure. It was assumed that 2/3 of the total emission from the portal is dispersed in the first 60m box and 1/3 of the total emission is dispersed in the second 60m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) A noise semi-enclosure (about 120m) is built between two noise enclosure. It was assumed that 2/3 of the total emission from the portal is dispersed in the first 60m box and 1/3 of the total emission is dispersed in the second 60m.

Appendix 3.5 - Emission Inventory for Portal Emissions

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) A noise semi-enclosure (about 120m) is built between two noise enclosure. It was assumed that 2/3 of the total emission from the portal is dispersed in the first 60m box and 1/3 of the total emission is dispersed in the second 60m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) A noise semi-enclosure (about 120m) is built between two noise enclosure. It was assumed that 2/3 of the total emission from the portal is dispersed in the first 60m box and 1/3 of the total emission is dispersed in the second 60m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) A noise semi-enclosure (about 120m) is built between two noise enclosure. It was assumed that 2/3 of the total emission from the portal is dispersed in the first 60m box and 1/3 of the total emission is dispersed in the second 60m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) A noise semi-enclosure (about 120m) is built between two noise enclosure. It was assumed that 2/3 of the total emission from the portal is dispersed in the first 60m box and 1/3 of the total emission is dispersed in the second 60m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Section	085C01-085C13
Enclosure Involved	085P3
Road Located	088
Vehicle EF Adopted	085

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Section	085C01-085C13
Enclosure Involved	085P3
Road Located	088
Vehicle EF Adopted	085

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Section	085C01-085C13
Enclosure Involved	085P3
Road Located	088

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Section	085C01-085C13
Enclosure Involved	085P3
Road Located	088
Vehicle EF Adopted	085

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Section	085C01-085C13
Enclosure Involved	085P3
Road Located	088
Vehicle EF Adopted	085

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Section	085C01-085C13
Enclosure Involved	085P3
Road Located	088
Vehicle EF Adopted	085

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Section	085C01-085C13
Enclosure Involved	085P3
Road Located	088
Vehicle EF Adopted	085

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Section	085C01-085C13
Enclosure Involved	085P3
Road Located	088
Vehicle EF Adopted	085

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Section	086A01-086A09
Enclosure Involved	086P1
Road Located	086
Vehicle EF Adopted	086

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 65m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 15m

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 65m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 15m

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 65m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 15m

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 65m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 15m

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 65m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 15m

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Section	086A01-086A09
Enclosure Involved	086P1
Road Located	086
Vehicle EF Adopted	086

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 65m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 15m

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Section	086A01-086A09

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 65m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 15m

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 65m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 15m

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 65m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 15m

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Section	086A01-086A09
Enclosure Involved	086P1
Road Located	086

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 65m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 15m

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 65m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 15m

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Section	086A01-086A09
Enclosure Involved	086P1
Road Located	086
Vehicle EF Adopted	086

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 65m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 15m

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Section	086B01-086B15
Enclosure Involved	086P2
Road Located	086
Vehicle EF Adopted	086

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Section	086B01-086B15

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Section	086B01-086B15
Enclosure Involved	086P2
Road Located	086

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Section	086B01-086B15
Enclosure Involved	086P2
Road Located	086
Vehicle EF Adopted	086

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Section	086B01-086B15
Enclosure Involved	086P2
Road Located	086
Vehicle EF Adopted	086

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Section	086B01-086B15
Enclosure Involved	086P2

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 80m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 30m

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 80m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 30m

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 80m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 30m

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 80m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 30m

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 80m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 30m

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 80m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 30m

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 80m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 30m

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Section	103A01-103A08
Enclosure Involved	103P1
Road Located	103
Vehicle EF Adopted	103

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 80m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 30m

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 80m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 30m

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 80m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 30m

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 80m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 30m

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 80m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 30m

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 80m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 30m

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Section	104A01-104A08

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 80m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 30m

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 80m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 30m

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Section: 104A01-104A08
Enclosure Involvec: 104P1
Road Located: 104
Vehicle EF Adopte: 104

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 80m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 30m

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 80m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 30m

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Section 104A01-104A08
Enclosure Involvec 104P1
Road Located 104

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 80m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 30m

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Section: 104A01-104A08
Enclosure Involvec: 104P1
Road Located: 104
Vehicle EF Adopte: 104

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 80m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 30m

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Section: 104A01-104A08
Enclosure Involved: 104P1
Road Located: 104
Vehicle EF Adopted: 104

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 80m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 30m

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Section: 104A01-104A08
Enclosure Involvec: 104P1
Road Located: 104
Vehicle EF Adopte: 104

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 80m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 30m

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 80m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 30m

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 80m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 30m

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Section: 104A01-104A08
Enclosure Involved: 104P1
Road Located: 104
Vehicle EF Adopted: 104

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 80m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 30m

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Section: 104B01-104B15
Enclosure Involved: 104P2
Road Located: 106
Vehicle EF Adopted: 104

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Section: 104B01-104B15
Enclosure Involved: 104P2
Road Located: 106
Vehicle EF Adopted: 104

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Section: 104B01-104B15
Enclosure Involved: 104P2
Road Located: 106
Vehicle EF Adopted: 104

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Section 104B01-104B15
Enclosure Involvec 104P2
Road Located 106
Vehicle EF Adopte 104

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Section: 104B01-104B15
Enclosure Involvec: 104P2
Road Located: 106
Vehicle EF Adopte: 104

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Section	104C01-104C20
Enclosure Involved	104P3
Road Located	089
Vehicle EF Adopted	104

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Section	104C01-104C20

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Section	104D01-104D20
Enclosure Involvec	104P4
Road Located	123

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Section	108A01-108A03
Enclosure Involvec	108P1
Road Located	108

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 54m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 36m and 1/3 of the total emission is dispersed in the remaining 18m

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Section	108A01-108A03
Enclosure Involved	108P1
Road Located	108
Vehicle EF Adopted	108

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 54m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 36m and 1/3 of the total emission is dispersed in the remaining 18m

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Section	108A01-108A03
Enclosure Involved	108P1

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 54m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 36m and 1/3 of the total emission is dispersed in the remaining 18m

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 54m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 36m and 1/3 of the total emission is dispersed in the remaining 18m

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Section	108A01-108A03

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 54m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 36m and 1/3 of the total emission is dispersed in the remaining 18m

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 54m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 36m and 1/3 of the total emission is dispersed in the remaining 18m

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 54m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 36m and 1/3 of the total emission is dispersed in the remaining 18m

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 54m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 36m and 1/3 of the total emission is dispersed in the remaining 18m

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 54m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 36m and 1/3 of the total emission is dispersed in the remaining 18m

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Section	108A01-108A03
Enclosure Involved	108P1
Road Located	108
Vehicle EF Adopted	108

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 54m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 36m and 1/3 of the total emission is dispersed in the remaining 18m

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Section	109A01-109A05
Enclosure Involved	109P1
Road Located	109
Vehicle EF Adopted	109

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Section	109A01-109A05
Enclosure Involved	109P1
Road Located	109
Vehicle EF Adopted	109

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Section: 109A01-109A05
Enclosure Involved: 109P1
Road Located: 109
Vehicle EF Adopted: 109

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(Without Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Section	109A01-109A05
Enclosure Involved	109P1
Road Located	109

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.
