APPENDIX 3.5

DEATILED CALCULATION OF PORTAL EMISSIONS

Appendix 3.5 - Emission Inventory for Portal Emissions

Parameters of the Enclosures

Enclosure ID	Description	Road ID Involved	Length of Enclosure	Width of Enclosure	Height of Enclosure	Initial Lateral Dimension [(a)]	Initial Vertical Dimension [(b)]
			(m)	(m)	(m)	(σy)	(σz)
085P1	Wong Chu Road WB	085	227.0	7.0	7.6	3.256	3.535
085P2	Wong Chu Road WB	087	230.3	4.0	7.6	1.860	3.535
085P3	Wong Chu Road WB	088	230.3	8.0	7.6	3.721	3.535
086P1	Wong Chu Road EB	086	105.7	7.0	7.6	3.256	3.535
086P2	Wong Chu Road EB	086	228.8	7.0	7.6	3.256	3.535
103P1	Tuen Mun Road NB	103	183.3	12.0	11.3	5.581	5.256
104P1	Tuen Mun Road SB	104	276.8	12.0	11.3	5.581	5.256
104P2	Tuen Mun Road SB	106	90.9	7.0	11.3	3.256	5.256
104P3	Tuen Mun Road SB	089	90.9	5.0	11.3	2.326	5.256
104P4	Tuen Mun Road SB	123	90.9	5.0	11.3	2.326	5.256
108P1	Tuen Mun Road SB	108	118.5	18.0	8.0	8.372	3.721
109P1	Tuen Mun Road SB	109	182.8	18.0	8.0	8.372	3.721

Notes:

(a) Initial Lateral Dimension as suggested in "Screening Procedures for Estimating the Air Quality Impact of Stationary Sources, Revised (EPA-454/R-92-019, October 1992)": Initial Lateral Dimension = Width of Enclosure ÷ 2.15.

(b) Initial Vertical Dimension as suggested in "Screening Procedures for Estimating the Air Quality Impact of Stationary Sources, Revised (EPA-454/R-92-019, October 1992)": Initial Vertical Dimension = Height of Enclosure ÷ 2.15.

Notes:

(a) Release Height is referenced from AERMOD User's Guide (USEPA,2022). Release Height = Height of Enclosure ÷ 2.

(b) Initial Lateral Dimension is referenced from AERMOD User's Guide (USEPA,2022). Initial Lateral Dimension = Width of Enclosure ÷ 2.15.

(c) Initial Vertical Dimension is referenced from AERMOD User's Guide (USEPA,2022). Initial Vertical Dimension = Height of Enclosure ÷ 2.15.

(d) Portal emissions from Enclosure 085P1 (085A01 to 085A09) were assumed to be emitted from the top of the noise barriers where located at the end of noise enclosure, an adjustment of +3m (top of noise enclosure) was included in the model release height.

(e) Portal emissions from Enclosure 085P2 (085B01 to 085A31) were assumed to be emitted from the edge of the noise semi-enclosure where located at the left-side end of noise enclosure, an adjustment of +7m (top of noise semi-enclosure) was included in the model release height.

(f) Portal emissions from Enclosure 085P3 (085C01 to 085C13) were assumed to be emitted from the top of the noise barriers where located at the right-side end of noise enclosure, an adjustment of +3m (top of noise enclosure) was included in the model release height.

(g) Portal emissions from Enclosure 086P1 (086A01 to 086A09) were assumed to be emitted from the top of the noise barriers where located at the end of noise enclosure, an adjustment of +3m (top of noise enclosure) was included in the model release height.

(h) Portal emissions from Enclosure 086P2 (086B01 to 086B15) were assumed to be emitted from the top edge of the noise cantilevers where located at the end of noise enclosure, an adjustment of +5m (top of noise enclosure) was included in the model release height.

(i) Portal emissions from Enclosure 103P1 (103A01 to 103A08) were assumed to be emitted from the top of the noise enclosure, an adjustment of +11.5m (top of noise enclosure) was included in the model release height.

(j) Portal emissions from Enclosure 104P1 (104A01 to 104A08) were assumed to be emitted from the top of the noise enclosure, an adjustment of +11.5m (top of noise enclosure) was included in the model release height.

(k) Portal emissions from Enclosure 104P2 (104B01 to 104B15) were assumed to be emitted from the top edge of the noise cantilevers where located at the end of noise enclosure, an adjustment of +8m (top of noise enclosure) was included in the model release height.

(l) Portal emissions from Enclosure 104P4 (104D01 to 104D20) were assumed to be emitted from the top edge of the noise cantilevers where located at the end of noise enclosure, an adjustment of +8m (top of noise enclosure) was included in the model release height.

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 65m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 15m

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 65m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 15m

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 65m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 15m

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Section: 085A01-085A09
Enclosure Involvec: 085P1
Road Located: 085
Vehicle EF Adopte: 085

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 65m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 15m

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Section	085A01-085A09
Enclosure Involved	085P1
Road Located	085
Vehicle EF Adopted	085

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 65m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 15m

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 65m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 15m

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 65m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 15m

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 65m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 15m

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 65m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 15m

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 65m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 15m

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 65m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 15m

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 65m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 15m

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Section	085B01-085B31
Enclosure Involved	085P2
Road Located	087

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) A noise semi-enclosure (about 120m) is built between two noise enclosure. It was assumed that 2/3 of the total emission from the portal is dispersed in the first 60m box and 1/3 of the total emission is dispersed in the second 60m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Section	085B01-085B31

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) A noise semi-enclosure (about 120m) is built between two noise enclosure. It was assumed that 2/3 of the total emission from the portal is dispersed in the first 60m box and 1/3 of the total emission is dispersed in the second 60m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Section	085B01-085B31

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) A noise semi-enclosure (about 120m) is built between two noise enclosure. It was assumed that 2/3 of the total emission from the portal is dispersed in the first 60m box and 1/3 of the total emission is dispersed in the second 60m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Section	085B01-085B31

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) A noise semi-enclosure (about 120m) is built between two noise enclosure. It was assumed that 2/3 of the total emission from the portal is dispersed in the first 60m box and 1/3 of the total emission is dispersed in the second 60m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Section	085B01-085B31

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) A noise semi-enclosure (about 120m) is built between two noise enclosure. It was assumed that 2/3 of the total emission from the portal is dispersed in the first 60m box and 1/3 of the total emission is dispersed in the second 60m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Section	085B01-085B31

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) A noise semi-enclosure (about 120m) is built between two noise enclosure. It was assumed that 2/3 of the total emission from the portal is dispersed in the first 60m box and 1/3 of the total emission is dispersed in the second 60m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) A noise semi-enclosure (about 120m) is built between two noise enclosure. It was assumed that 2/3 of the total emission from the portal is dispersed in the first 60m box and 1/3 of the total emission is dispersed in the second 60m.

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) A noise semi-enclosure (about 120m) is built between two noise enclosure. It was assumed that 2/3 of the total emission from the portal is dispersed in the first 60m box and 1/3 of the total emission is dispersed in the second 60m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) A noise semi-enclosure (about 120m) is built between two noise enclosure. It was assumed that 2/3 of the total emission from the portal is dispersed in the first 60m box and 1/3 of the total emission is dispersed in the second 60m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) A noise semi-enclosure (about 120m) is built between two noise enclosure. It was assumed that 2/3 of the total emission from the portal is dispersed in the first 60m box and 1/3 of the total emission is dispersed in the second 60m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Section	085B01-085B31

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) A noise semi-enclosure (about 120m) is built between two noise enclosure. It was assumed that 2/3 of the total emission from the portal is dispersed in the first 60m box and 1/3 of the total emission is dispersed in the second 60m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Section	085C01-085C13
Enclosure Involved	085P3
Road Located	088
Vehicle EF Adopted	085

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Section	086A01-086A09
Enclosure Involved	086P1
Road Located	086
Vehicle EF Adopted	086

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 65m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 15m

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Section	086A01-086A09
Enclosure Involved	086P1
Road Located	086
Vehicle EF Adopted	086

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 65m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 15m

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Section	086A01-086A09
Enclosure Involved	086P1
Road Located	086

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 65m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 15m

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 65m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 15m

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 65m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 15m

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 65m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 15m

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Section: 086A01-086A09
Enclosure Involvec: 086P1
Road Located: 086
Vehicle EF Adopte: 086

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 65m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 15m

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Section	086A01-086A09
Enclosure Involved	086P1
Road Located	086

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 65m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 15m

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 65m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 15m

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 65m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 15m

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 65m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 15m

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 65m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 15m

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Section	086B01-086B15
Enclosure Involved	086P2
Road Located	086
Vehicle EF Adopted	086

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Section	086B01-086B15
Enclosure Involved	086P2
Road Located	086
Vehicle EF Adopted	086

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Section	086B01-086B15
Enclosure Involved	086P2
Road Located	086

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Section	086B01-086B15
Enclosure Involved	086P2

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Section	086B01-086B15
Enclosure Involved	086P2
Road Located	086
Vehicle EF Adopted	086

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Section	086B01-086B15
Enclosure Involved	086P2
Road Located	086

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 80m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 30m

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Section	103A01-103A08
Enclosure Involved	103P1
Road Located	103

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 80m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 30m

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 80m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 30m

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Section	103A01-103A08
Enclosure Involved	103P1
Road Located	103

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 80m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 30m

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 80m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 30m

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Section	103A01-103A08
Enclosure Involved	103P1
Road Located	103
Vehicle EF Adopted	103

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 80m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 30m

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Section	103A01-103A08
Enclosure Involved	103P1
Road Located	103
Vehicle EF Adopted	103

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 80m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 30m

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Section	103A01-103A08
Enclosure Involved	103P1
Road Located	103
Vehicle EF Adopted	103

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 80m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 30m

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Section	103A01-103A08
Enclosure Involved	103P1
Road Located	103
Vehicle EF Adopted	103

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 80m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 30m

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 80m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 30m

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 80m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 30m

Appendix 3.5 - Emission Inventory for Portal Emissions

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 80m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 30m

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 80m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 30m

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 80m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 30m

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 80m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 30m

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 80m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 30m

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 80m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 30m

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Section	104A01-104A08
Enclosure Involved	104P1
Road Located	104
Vehicle EF Adopted	104

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 80m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 30m

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 80m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 30m

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Section	104A01-104A08
Enclosure Involved	104P1
Road Located	104
Vehicle EF Adopted	104

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 80m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 30m

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 80m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 30m

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 80m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 30m

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 80m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 30m

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 80m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 30m

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Section	104B01-104B15

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Section	104B01-104B15
Enclosure Involved	104P2
Road Located	106
Vehicle EF Adopted	104

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Section	104B01-104B15
Enclosure Involved	104P2
Road Located	106
Vehicle EF Adopted	104

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Section 104C01-104C20

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Section	104C01-104C20
Enclosure Involved	104P3
Road Located	089
Vehicle EF Adopted	104

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Section	104D01-104D20
Enclosure Involved	104P4
Road Located	123
Vehicle EF Adopted	104

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Section	104D01-104D20

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 54m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 36m and 1/3 of the total emission is dispersed in the remaining 18m

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 54m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 36m and 1/3 of the total emission is dispersed in the remaining 18m

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 54m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 36m and 1/3 of the total emission is dispersed in the remaining 18m

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 54m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 36m and 1/3 of the total emission is dispersed in the remaining 18m

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Section	108A01-108A03

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 54m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 36m and 1/3 of the total emission is dispersed in the remaining 18m

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 54m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 36m and 1/3 of the total emission is dispersed in the remaining 18m

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Section	108A01-108A03
Enclosure Involved	108P1
Road Located	108

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 54m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 36m and 1/3 of the total emission is dispersed in the remaining 18m

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 54m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 36m and 1/3 of the total emission is dispersed in the remaining 18m

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 54m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 36m and 1/3 of the total emission is dispersed in the remaining 18m

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 54m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 36m and 1/3 of the total emission is dispersed in the remaining 18m

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Section	109A01-109A05
Enclosure Involved	109P1
Road Located	109
Vehicle EF Adopted	109

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Section	109A01-109A05
Enclosure Involved	109P1
Road Located	109
Vehicle EF Adopted	109

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Section	109A01-109A05
Enclosure Involved	109P1
Road Located	109
Vehicle EF Adopted	109

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Short-term assessment)

Section	109A01-109A05
Enclosure Involved	109P1

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Section	085A01-085A09
Enclosure Involved	085P1
Road Located	085
Vehicle EF Adopted	085

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 65m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 15m

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Section: 085A01-085A09

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 65m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 15m

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 65m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 15m

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Section	085A01-085A09

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 65m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 15m

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Section: 085A01-085A09
Enclosure Involved: 085P1
Road Located: 085
Vehicle EF Adopted: 085

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 65m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 15m

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Section	085A01-085A09
Enclosure Involved	085P1

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 65m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 15m

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Section	085A01-085A09
Enclosure Involved	085P1
Road Located	085

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 65m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 15m

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Section	085A01-085A09
Enclosure Involved	085P1
Road Located	085
Vehicle EF Adopted	085

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 65m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 15m

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 65m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 15m

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 65m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 15m

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 65m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 15m

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) A noise semi-enclosure (about 120m) is built between two noise enclosure. It was assumed that 2/3 of the total emission from the portal is dispersed in the first 60m box and 1/3 of the total emission is dispersed in the second 60m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) A noise semi-enclosure (about 120m) is built between two noise enclosure. It was assumed that 2/3 of the total emission from the portal is dispersed in the first 60m box and 1/3 of the total emission is dispersed in the second 60m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) A noise semi-enclosure (about 120m) is built between two noise enclosure. It was assumed that 2/3 of the total emission from the portal is dispersed in the first 60m box and 1/3 of the total emission is dispersed in the second 60m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Section	085B01-085B31

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) A noise semi-enclosure (about 120m) is built between two noise enclosure. It was assumed that 2/3 of the total emission from the portal is dispersed in the first 60m box and 1/3 of the total emission is dispersed in the second 60m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Section	085B01-085B31

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) A noise semi-enclosure (about 120m) is built between two noise enclosure. It was assumed that 2/3 of the total emission from the portal is dispersed in the first 60m box and 1/3 of the total emission is dispersed in the second 60m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Section	085B01-085B31

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) A noise semi-enclosure (about 120m) is built between two noise enclosure. It was assumed that 2/3 of the total emission from the portal is dispersed in the first 60m box and 1/3 of the total emission is dispersed in the second 60m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Section	085B01-085B31

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) A noise semi-enclosure (about 120m) is built between two noise enclosure. It was assumed that 2/3 of the total emission from the portal is dispersed in the first 60m box and 1/3 of the total emission is dispersed in the second 60m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Section	085B01-085B31

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) A noise semi-enclosure (about 120m) is built between two noise enclosure. It was assumed that 2/3 of the total emission from the portal is dispersed in the first 60m box and 1/3 of the total emission is dispersed in the second 60m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Section	085B01-085B31

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) A noise semi-enclosure (about 120m) is built between two noise enclosure. It was assumed that 2/3 of the total emission from the portal is dispersed in the first 60m box and 1/3 of the total emission is dispersed in the second 60m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Section	085B01-085B31

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) A noise semi-enclosure (about 120m) is built between two noise enclosure. It was assumed that 2/3 of the total emission from the portal is dispersed in the first 60m box and 1/3 of the total emission is dispersed in the second 60m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) A noise semi-enclosure (about 120m) is built between two noise enclosure. It was assumed that 2/3 of the total emission from the portal is dispersed in the first 60m box and 1/3 of the total emission is dispersed in the second 60m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) A noise semi-enclosure (about 120m) is built between two noise enclosure. It was assumed that 2/3 of the total emission from the portal is dispersed in the first 60m box and 1/3 of the total emission is dispersed in the second 60m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Section	085C01-085C13

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Section	085C01-085C13
Enclosure Involved	085P3
Road Located	088
Vehicle EF Adopted	085

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Section	085C01-085C13
Enclosure Involved	085P3
Road Located	088
Vehicle EF Adopted	085

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Section	085C01-085C13
Enclosure Involved	085P3
Road Located	088
Vehicle EF Adopted	085

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Section 086A01-086A09
Enclosure Involvec 086P1
Road Located 086

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 65m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 15m

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Section	086A01-086A09
Enclosure Involved	086P1
Road Located	086

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 65m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 15m

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Section	086A01-086A09
Enclosure Involved	086P1

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 65m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 15m

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Section	086A01-086A09
Enclosure Involved	086P1
Road Located	086

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 65m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 15m

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Section	086A01-086A09
Enclosure Involved	086P1
Road Located	086
Vehicle EF Adopted	086

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 65m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 15m

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Section	086A01-086A09
Enclosure Involved	086P1
Road Located	086
Vehicle EF Adopted	086

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 65m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 15m

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Section	086A01-086A09
Enclosure Involved	086P1
Road Located	086
Vehicle EF Adopted	086

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 65m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 15m

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 65m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 15m

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 65m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 15m

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Section	086A01-086A09
Enclosure Involved	086P1
Road Located	086

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 65m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 15m

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Section	086A01-086A09

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 65m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 15m

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Section	086A01-086A09
Enclosure Involved	086P1
Road Located	086

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 65m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 15m

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Section	086B01-086B15
Enclosure Involved	086P2

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Section	086B01-086B15
Enclosure Involved	086P2
Road Located	086
Vehicle EF Adopted	086

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Section	086B01-086B15
Enclosure Involved	086P2
Road Located	086
Vehicle EF Adopted	086

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Section	086B01-086B15
Enclosure Involved	086P2
Road Located	086

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Section	086B01-086B15
Enclosure Involved	086P2
Road Located	086
Vehicle EF Adopted	086

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Section	086B01-086B15
Enclosure Involved	086P2
Road Located	086

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Section	086B01-086B15
Enclosure Involved	086P2

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Section	086B01-086B15
Enclosure Involved	086P2
Road Located	086

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Section	103A01-103A08
Enclosure Involved	103P1
Road Located	103
Vehicle EF Adopted	103

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 80m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 30m

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Section	103A01-103A08
Enclosure Involvec	103P1

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 80m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 30m

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Section	103A01-103A08
Enclosure Involved	103P1
Road Located	103
Vehicle EF Adopted	103

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 80m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 30m

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Section	103A01-103A08

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 80m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 30m

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 80m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 30m

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 80m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 30m

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Section	103A01-103A08

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 80m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 30m

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 80m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 30m

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Section	103A01-103A08
Enclosure Involved	103P1
Road Located	103
Vehicle EF Adopted	103

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 80m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 30m

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 80m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 30m

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 80m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 30m

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Section	103A01-103A08
Enclosure Involved	103P1
Road Located	103

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 80m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 30m

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 80m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 30m

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Section	104A01-104A08
Enclosure Involved	104P1
Road Located	104
Vehicle EF Adopted	104

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 80m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 30m

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Section	104A01-104A08
Enclosure Involved	104P1

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 80m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 30m

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 80m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 30m

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 80m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 30m

Appendix 3.5 - Emission Inventory for Portal Emissions

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 80m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 30m

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 80m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 30m

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 80m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 30m

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 80m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 30m

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 80m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 30m

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 80m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 30m

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) The distance to te next portal is less than 100m (i.e. 80m). It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the remaining 30m

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Section	104B01-104B15
Enclosure Involved	104P2
Road Located	106
Vehicle EF Adopted	104

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Section	104B01-104B15
Enclosure Involved	104P2
Road Located	106
Vehicle EF Adopted	104

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Section	104B01-104B15
Enclosure Involved	104P2
Road Located	106
Vehicle EF Adopted	104

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Section: 104B01-104B15
Enclosure Involvec: 104P2
Road Located: 106
Vehicle EF Adopte: 104

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Section	104B01-104B15
Enclosure Involved	104P2
Road Located	106
Vehicle EF Adopted	104

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Long-term assessment)

Section	104B01-104B15
Enclosure Involved	104P2
Road Located	106
Vehicle EF Adopted	104

Notes:

(a) Traffic Flow and Composite Emission Factors are adopted from Appendix 3.2 and 3.3 respectively.

(b) It was assumed that 2/3 of the total emission from the portal is dispersed in the first 50m and 1/3 of the total emission is dispersed in the second 50m.

Appendix 3.5 - Emission Inventory for Portal Emissions

(With Project Operation)

Calculations of Portal Emissions (Long-term assessment)
