备注：建筑废物处理收费计划根据《废物处理（建筑废物处理收费）规例》（第354A章）制定。
Remark: The Construction Waste Disposal Charging Scheme is made under WASTE DISPOSAL (CHARGES FOR DISPOSAL OF CONSTRUCTION WASTE) REGULATION. (Cap. 354A)
The Construction Waste Disposal Charging Scheme

The Charging Scheme

- The legislations for the Construction Waste Disposal Charging Scheme (Charging Scheme) have been passed by the Legislative Council. The Charging Scheme will commence in the latter half of 2005.
- Construction waste means any substance, matter or thing that is generated from construction work and abandoned, whether or not it has been processed or stockpiled before being abandoned, but does not include any sludge, screenings or matter removed in or generated from any desludging, desilting or dredging works.
- Construction waste producers, such as construction contractors, renovation contractors or premises owners, prior to using government waste disposal facilities, need to open a billing account with the Environmental Protection Department and pay for the construction waste disposal charge.
- Through the Charging Scheme, construction waste producers are encouraged to reduce, sort and recycle construction waste so that their disposal costs can be minimised and our valuable landfill space can be preserved.

Government Waste Disposal Facilities for Construction Waste

The following government waste disposal facilities accept different types of construction waste:

<table>
<thead>
<tr>
<th>Government waste disposal facilities (Please see location map overhead)</th>
<th>Type of construction waste accepted</th>
<th>Charge per tonne*</th>
</tr>
</thead>
<tbody>
<tr>
<td>Public fill reception facilities</td>
<td>Consisting entirely of inert construction waste**</td>
<td>$71</td>
</tr>
<tr>
<td>Sorting facilities</td>
<td>Containing more than 50% by weight of inert construction waste**</td>
<td>$175</td>
</tr>
<tr>
<td>Landfills®</td>
<td>Containing not more than 50% by weight of inert construction waste**</td>
<td>$200</td>
</tr>
<tr>
<td>Outlying Islands Transfer Facilities®</td>
<td>Containing any percentage of inert construction waste**</td>
<td>$200</td>
</tr>
</tbody>
</table>

* Except for the Outlying Islands Transfer Facilities, the minimum charge load is 1 tonne, i.e. if a load of waste weighs 1 tonne or less, it will be charged as 1 tonne. A load of waste weighing more than 1 tonne will be charged at 0.1 tonne increment. For Outlying Islands Transfer Facilities, the charge is $20 per 0.1 tonne and the minimum charge load is 0.1 tonne.

** Inert construction waste means rock, rubble, boulder, earth, soil, sand, concrete, asphalt, brick, tile, masonry or used bentonite.

Please observe the commencement date of the Charging Scheme to be announced.

Open a billing account to pay charges

- After the commencement of the Charging Scheme, main contractor who undertakes construction work under a contract with value of $1 million or above shall open a billing account solely for the contract and pay the charges through the account. Application shall be made within 21 days after the contract is awarded. Failing this will be an offence under the law.
- For construction work under a contract with value less than $1 million, such as minor construction or renovation works, any person such as the owner of the premises where the construction works take place or his/her contractor can open a billing account and pay the charge through the account. The premises owner concerned may also engage a contractor with a valid billing account to make arrangement for disposal of construction waste.

Remark: For construction works contracts awarded or tenders of which closed before the relevant legislations come into operation, application for exemption from charges can be made within 21 days after the legislations have been effected.
