HONG KONG GREEN ELECTRONIC ASSEMBLY COMPANY

Environmental Policy

Hong Kong Green Electronic Assembly Company (HKGEAC) adopts a high level of environmental awareness and care throughout the company. We aim to:

1. Comply with applicable legal requirements and other requirements to which the Company subscribes which relate to its environmental aspects.
2. Prevent or minimize and make safe releases to air, water and land of substances that could adversely affect the environment.
3. Reduce waste at the source by careful use of materials, energy and other resources, and maximize recycling opportunities.
4. Seek continual improvement and prevention of pollution.
5. Set and review objectives and targets to improve environmental performance based upon systematic evaluation of significant aspects of process and products.
6. Provide employee training commensurate with specific duties, roles and responsibilities for protecting the environment.
7. Have top management review and improve our Environmental Management System to ensure its continuing suitability, adequacy and effectiveness.
8. Communicate the Environmental Policy to all employees and make it available to the public.
