

Date of the Accident : 20 January 2006**Time :** 0930**Location :** Project site (Green Park) Sedimentation tank**Type of Accident :** Leakage of chemical wastes**Detailed Description of the Accident :**

A 200 L chemical waste drum was damaged and about 100 L spent lube oil was leaked to ground.

Responses / Corrective Actions :

Removed the contaminated soil and disposed of as chemical waste.

Possible Causes(s) of the Accident:

The chemical waste drum, which was located on the road, was crashed by a lorry, and leading to the chemical waste leakage accident.

Suggested Preventive Measures:

Ensure to locate / store the chemical materials (new or used) properly (e.g. labelling and handling, etc), briefing sections will be given to all frontline staff.
