

## **CONSULTATION PAPER**

### **Proposed Revision of Construction Work Designated Areas under Section 8A(1) of the Noise Control Ordinance (Cap. 400) (“Designated Areas”)**

#### **PURPOSE**

This paper invites view on Government’s proposal to amend the existing “Designated Areas”. The proposal aims to take account of the development in Hong Kong over the past years with a view to covering populated built-up areas in the territory as “Designated Areas”. The amendment will provide residents in the “Designated Areas” with the protection against construction noise during night-time and general holidays under the Noise Control Ordinance (“the Ordinance”). This consultation paper sets out the relevant proposals and welcomes public comments on the proposals on or before 29 August 2022.

#### **BACKGROUND**

2. To reduce the impact of noisy construction activities conducted in populated built-up areas on the nearby residents, the Ordinance provides for the Secretary for Environment and Ecology to establish certain populated built-up areas as “Designated Areas” by notice published in the Gazette.

3. Under the Ordinance, noise from construction works using any powered mechanical equipment between the hours of 7 p.m. and 7 a.m. or at any time on a general holiday (“the restricted hours”), is controlled by means of a Construction Noise Permit (“CNP”) system. Generally, a CNP will only be issued if the noise which will be generated complies with the requirements stipulated in relevant Technical Memorandum issued under the Ordinance. There are provisions for special cases to allow for essential construction works during the restricted hours in order to avoid serious interruption or disruption to road, rail or other utilities arising from the carrying out of construction activities in the day-time.

4. In 1995, the Ordinance was amended to provide for the establishment of “Designated Areas” in the following year, with an aim to further control over construction noise and protect residents during the restricted hours. “Designated Areas” refer to built-up areas in the territory predominantly used for residential purpose, which are densely populated and more vulnerable to noise disturbance. In

“Designated Areas”, more stringent control would be applied when assessing CNP applications. For the use of specified powered mechanical equipment<sup>1</sup>, the noise limits<sup>2</sup> would be 15dB(A) lower than those required in “non-Designated Areas”, while prescribed construction works<sup>3</sup> must be conducted with valid CNPs.

5. The “Designated Areas” were first established in 1996 and were subsequently amended in 2001 and 2009 taking account of the rapid development in Hong Kong over the years. The map showing the existing “Designated Areas” which has been in operation since January 2009 is attached in Annex A.

## **THE PROPOSAL**

6. In view of the developments in Hong Kong since 2009, it is appropriate now to further expand the coverage of the “Designated Areas” to include newly developed populated built-up areas; areas where development has been actively taking place and population intake is expected to commence within the coming few years; and other populated built-up areas in the territory not yet covered. Some areas adjoining the existing and proposed “Designated Areas” which form parts of the communities have also been identified for inclusion. In parallel, to avoid placing unnecessary constraints on the construction of major new development area projects, some areas that are currently designated but are about to have major new developments to be carried out will be excluded, for example in Kwu Tung North. The excluded areas will be timely reconsidered to be included as “Designated Areas” again having regard to the future situation. Moreover, some major new development areas where population intake is expected to commence in stages will be marked as “Designated Areas” for implementation on a later specified date, for example, in Kai Tak Development and Anderson Road Development sites.

7. The proposed amendment, including the new “Designated Areas”, the “Designated Areas” to be implemented on a later date, and the existing “Designated Areas” to be excluded is shown in Annex B. A list of the major areas covered in the proposed “Designated Areas” is given in Annex C.

---

<sup>1</sup> Specified powered mechanical equipment includes handheld breaker, bulldozer, handheld vibratory poker, dump truck and concrete lorry mixer.

<sup>2</sup> The noise limits are set out in the relevant Technical Memoranda issued under section 9(1) of the Ordinance, namely the Technical Memorandum on Noise from Construction Work other than Percussive Piling and the Technical Memorandum on Noise from Construction Work in Designated Areas.

<sup>3</sup> Prescribed construction works refer to noisy activities such as hammering, erection or dismantling of formwork or scaffolding, and loading, unloading or handling of rubble, wooden boards, steel bars, wood or scaffolding material.

(Note: The proposed amendment will not affect the applicability of the CNP control system mentioned in paragraph 3 above to relevant construction work carried out within or outside the “Designated Areas”.)

## **PROPOSED IMPLEMENTATION DATE**

8. If the proposal is supported by the Advisory Council on the Environment and Legislative Council Panel on Environmental Affairs, we target to commence the amendment on or after 1 September 2023. The proposed “Designated Areas” in Kai Tak Development and Anderson Road development, having regard to their development scale and population intake in stages, will be implemented in two phases, i.e. the first phase no earlier than 1 September 2023 and the second phase no earlier than 1 January 2027.

## **VIEWS SOUGHT**

9. We would like to invite your views on the proposal. Please send us your views through any of the following channels on or before 29 August 2022 -

By Post :      Assessment and Noise Group  
                 Environmental Protection Department  
                 26/F., Southorn Centre,  
                 130 Hennessy Road, Wan Chai, Hong Kong  
                 (Attn.: DA Revision Consultation)

By Fax :        2802 4511

By Email :     [da\\_view@epd.gov.hk](mailto:da_view@epd.gov.hk)

10. Please note that the Government may, either in discussion with others or in any subsequent report, whether privately or publicly, refer to and attribute views submitted in response to this consultation document. Any request to treat all or part of a response in confidence will be respected, but if no such request is made, it will be assumed that the response is not intended to be confidential.
