Issue 4
August 1999

Final Report (Issue 4)**Contents**

	<u>Page No.</u>
1. INTRODUCTION	1/ 1
1.1 Background	1
1.2 The Assignment	2
1.3 Structure of the Working Paper	2
2. REVIEW OF SCOPING STUDY	2/ 1
2.1 Background and Methodology	1
2.2 Results of the Scoping Study on Existing Flyovers	3
3. APPROACH AND METHODOLOGY	3/ 1
3.1 General	1
3.2 Noise Assessment	1
3.3 Engineering Consideration	3
3.4 Landscape and Visual Assessment	5
3.5 Air Quality Assessment	6
3.6 Environmental Gains and Losses Account	6
3.7 Cost Estimation	6
4. ASSESSMENT OF MITIGATION MEASURES ON AP LEI CHAU BRIDGE	4/ 1
4.1 Identification of Noise Sensitive Receivers (NSRs)	1
4.2 Traffic Noise Impact Assessment	1
4.3 Proposed Mitigation Scenarios for Engineering Consideration	2
4.4 Engineering Feasibility	2
4.5 Review on Acoustic Effectiveness and Findings	3
4.6 Air Quality Assessment	4
4.7 Visual/Landscape Assessment	4
4.8 Environmental Gains and Losses Account	4
4.9 Cost Estimation	5
5. ASSESSMENT OF MITIGATION MEASURES ON TSING TSUEN BRIDGE	5/ 1
5.1 Identification of Noise Sensitive Receivers (NSRs)	1
5.2 Traffic Noise Impact Assessment	1
5.3 Proposed Mitigation Scenarios for Engineering Consideration	2
5.4 Engineering Feasibility	2
5.5 Review on Acoustic Effectiveness and Findings	5

5.6	Air Quality Assessment	6
5.7	Visual/Landscape Assessment	6
5.8	Environmental Gains and Losses Account	7
5.9	Cost Estimation	8
6.	ASSESSMENT OF MITIGATION MEASURES ON KWAI CHUNG ROAD FLYOVER	6/ 1
6.1	Identification of Noise Sensitive Receivers (NSRs)	1
6.2	Traffic Data for Model Analysis	1
6.3	Development of Mitigation Measures	1
6.4	Engineering Feasibility	3
6.5	Summary	16
7.	SIMPLIFIED WORKING TOOLS FOR FLYOVER ASSESSMENT	7/ 1
7.1	Introduction	1
7.2	Identification of Problems	2
7.3	Selection of Barrier Form	2
7.4	Space / Land Availability	2
7.5	Emergency Access and Fire Fighting Considerations	3
7.6	Road Safety Considerations	3
7.7	Preliminary Engineering Feasibility and Acoustic Effectiveness	3
8.	DEVELOPMENT OF PRIORITY RANKING SYSTEM	8/ 1
8.1	Ranking based on Population Exposure	1
8.2	Ranking based on Cost-effectiveness	1
8.3	Recommended Ranking System	1
8.4	Priority Ranking of the Recommended Mitigation Measures	2
9.	IMPLEMENTATION STRATEGY	9/ 1
9.1	Overview	1
9.2	Key Statutory, Administrative and Consultative Steps	1
9.3	Staffing	2
9.4	Funding for Consultants	3
9.5	Process	3
10.	CONCLUSION AND RECOMMENDATIONS	10/ 1
10.1	General	1
10.2	Ap Lei Chau Bridge	1
10.3	Tsing Tsuen Bridge	2
10.4	Kwai Chung Road Flyover near Mei Foo Sun Chuen	3
10.5	Overall Summary of Results and Recommendations	5
10.6	Recommendations for Further Works	6

APPENDICES

Appendix	A1	Technical Paper No. 2 - Traffic Noise Impact Assessment
Appendix	A2	Technical Paper No. 2 - Traffic Noise Impact Assessment (Supplementary Report)
Appendix	B	Technical Paper No. 3 - Air Quality Impact Assessment
Appendix	C	Structural Assessment Calculation for Ap Lei Chau Bridge & Tsing Tsuen Bridge
Appendix	D	Structural Assessment Calculation for Kwai Chung Road Flyover near Mei Foo Sun Chuen
Appendix	E1	Flow Charts for Simplified Assessment Procedures for Providing Noise Mitigation on Existing Flyovers
Appendix	E2	Application of Simplified Assessment Flow Charts
Appendix	F	Responses to Comments on Final Report (Issue 1, March 99).
