Remarks :

Road Categories :

EX	- Expressway
UT	- Urban / Rural Trunk Road
PD	- Primary Distributor
DD	- District Distributor
LD	- Local Distributor
RR	- Rural Road

Barrier Forms :

VB1	- Plan Barrier with vertical height 3m
VB2	- Plan Barrier with vertical height 4m
VB3	- Plan Barrier with vertical height 5m
BB (Type A)	- Cantilevered Barrier with vertical height 5.6m
BB (Type B)	- Cantilevered Barrier with vertical height 6.4m
SE	- Semi-Enclosure
FE	- Full Enclosure

Reasons for not recommending / Previous EIA reports or studies since 1996 :

- 1 Low population density
Population density - Total number of dwellings protected per unit length along the road through the map
- 2 It's not a noisy road
There is no major noise problem and no mitigation measures required if a road fulfills the following scenarios :
Scenario I : The road has 4 traffic lanes and the façade distance is greater than 400m
Scenario II : The road has 2 traffic lanes and the façade distance is greater than 45m
- 3 Intercept of EVA
 - vehicular access to areas on both sides of a road is blocked; or
 - emergency crossing to the opposite lane of a road is blocked.
- 4 Interfere with fire fighting
 - external rescue and fire fighting operation by means of ladders is rendered impossible
- 5 Block sight line
Provision of a noise barrier close to an existing junction obstruct the visibility splays of the junction and installatin of a barrier along a bend on road obstruct the sight line for safe stopping.
- 6 Obstruct pedestrian or vehicular access
A noise barrier intercepts existing pedestrian and vehicular access at the carriageway.
- 7 Interfere with commercial activities
Provision of a noise barrier interfere with street level commercial activities, and cause social severance. Street level commercial activities include all shops, restaurants, cinemas etc.
- 8 No space available
The overall width of any amenity and/or open space and/or footpath is < 2.5m.
- 9 Low acoustic effectiveness
Less than 50% of affected properties located within the shadow zone or the angle of view reduced by 30% or less at over 50% of the affected properties.
- 10 No traffic flow
It refers to pedestrian walkways not opened to traffic.
