

Subject: sewage treatment

11.11.2004 10:51 AM

Now that you are consulting the public over sewage treatment, I offer the following:

The 25% remaining (phase 2) should go forward ASAP in its various stages (you do not need the 20 billion immediately) and costs would be absorbed by Central and HK SAR governments, corporate and industrial sources of the sewage, and by domestic sources of the sewage.

My company employs over 12 people and we all agree on this. But 11 of them will not bother to go to your website and join in the public consultation.

Dr. David L. Cosman
