

Dear Sir/Madam:

I am writing to you to express my opinion regarding the sewage charges.

I believe that the current sewage charges were way too low and as a result the government is paying the cost that was generated by users and this act is unfair and irresponsible.

I believe that the government should increase the sewage cost in order to not only to cover the cost of treatment, but to make a profit, this will have the following advantages,

- 1) it will encourage the environmental industry to grow, encouraging a new industry and creating new jobs.
- 2) it will help our current financial deficit,
- 3) the profit generated may provide funds for further development in the environment industry, eg, clean the air!
- 4) of course we can clean the sea around us...
- 5) most importantly, encourage people not to abuse the system...

Benjamin
