

Dear Sirs,

Our harbour is a critical part of Hong Kong and that we must do our absolute best to protect it from pollution and from over-development (which includes the majority of all harbour projects in recent years).

I just want to state that I fully support the HATS project (provided that it achieves the set targets and goals) no matter what the cost. All the tourists and businesses do not mean a thing if we don't have a harbour that no one wants to come see.

Sincerely,

Philip Heung
