The AFCD and fishing issues should be fully engaged in this process. It seems they are not. There is no need to clean the water, if there are no efforts made to improve the ecosystems of the water. That means, we need to support the government’s proposed ban on trawling in all of Hong Kong waters. With this ban, your efforts to clean the waters will be greatly improved and complemented. Without this ban, your efforts will be substantially diminished. We have a very good opportunity right now to make a big step in saving, and regenerating HK waters. both with your water management plan, AND with a ban on trawling. You cannot effectively do one without the other. If you do both, your results will be exponentially better than your currently plan predicts, that is because the ecosystem will recover, fish will return, and the benefits for ecotourism, sea recreation and sports will multiply.

問題(2)： 你對諮詢文件內第 2 節列出的實益用途和敏感受體有何意見？你認為在檢討中，還應考慮其他實益用途嗎？

Q(2): What are your views on the beneficial uses and sensitive receivers set out in Section 2 of the Engagement Document ? Are you aware of any other beneficial uses of waters that should be considered in this review ?
