

Department of Justice

Controlling Officer's Environmental Report 2007

1. Our environmental policy

The Department of Justice is committed to ensuring that our operations are conducted in an environmentally responsible manner. We exercise the principle of "Reduce, Reuse, Recycle and Replace" and seek continual improvement in the efficient use of resources.

2. Green measures adopted

Reduce

Reducing the consumption of paper

- sharing documents via the Local Area Network;
- using computer fax instead of normal fax machines;
- using electronic mail extensively for both inter-departmental and intra-departmental communication, and to respond to public enquiries received electronically;
- posting notices, circulars, announcements and government regulations which require wide circulation on the electronic bulletin board;
- providing a system to facilitate staff to keep and share documents in electronic form;
- providing a Bilingual Laws Information System to facilitate access to the Laws of Hong Kong by members of the Department and the public;
- providing the confidential mail system that allows the transmission of classified documents in electronic form; and
- reducing the printed copies of publications by the Department's library by providing CD-ROM and on-line databases which include law reports, statutes, statutory instruments, forms and precedents, practice directions, commentaries, treaties and dictionaries. Currently, we have 19 CD-ROMs and 22 on-line databases.

Reducing the use of standard printed stationery and publications

- regularly reminding staff not to send unclassified documents in envelopes;
- reducing the use of printed stationery such as forms, paper file jackets and tags;
- replacing paper diaries, calendars and telephone directories by electronic equivalents as far as practicable;
- ceasing the production of the performance pledge booklets since October 2001; and
- reducing the requirements for printed copies of the Government Gazette and other departmental publications, including performance pledge booklets and environmental reports etc..

Cutting down energy consumption

- appointing green wardens in all divisions of the department to monitor and maintain the room temperature at the target of 25.5 °C and remind colleagues to comply with other green housekeeping measures since July 2005;
- reminding all staff to switch off lights when not in the office;
- turning off electrical equipment and appliances (except those which should be switched on continuously, e.g. fax machines and water-coolers) when they are not needed;
- using energy saving equipment and devices wherever possible;
- reminding all staff to use the stairs instead of the elevator as far as practicable and not to open windows when air-conditioning is on; and
- promoting and putting into practice the use of open plan offices where operationally appropriate.

Reuse

- promoting the use of each piece of paper on both sides;
- reusing envelopes and folders if and when practicable; and
- reusing decorative items used at staff functions.

Recycle

- placing "green boxes" in different floors of our offices and waste paper collection bags in photocopying rooms for the collection of waste paper for recycling;

- trading-in used toner cartridges with the supplier for recycling; and
- using recycled paper instead of normal paper whenever possible.

Replace

- using environmental friendly products (e.g. refills for ball pen, refills for correction mouse, non-chlorinated correction fluid and alkaline batteries) as far as possible.

Other Green Measures

- providing a green workplace to staff by decorating offices with plants and improving air quality by using air purifiers for certain offices and cleaning of air-ducts.
- adopting electronic version of departmental reports as the main mode of publication.
- encouraging staff to dress causal and smart in summer months, where appropriate, to complement the energy conservation policy of the Government.

3. Green managers

- 3.1 The Departmental Secretary takes on the role of Departmental Green Manager. An Executive Officer in each of the six Divisions of the Department is designated as Divisional Green Manager to assist the Departmental Green Manager in initiating, implementing and reviewing green housekeeping programmes. Green wardens are appointed by Divisional Green Managers to assist in implementing various green measures in divisions. The Divisional Green Managers and green wardens also conduct audit checks on the implementation of green measures. Audit reports are reviewed at the Departmental Administration Committee regularly and appropriate measures are introduced where required.
- 3.2 To ensure that green practices are followed in daily operations, we have issued a checklist covering areas such as paper consumption, energy saving and the use of office stationery. The checklist is re-circulated regularly for staff to follow.

4. Performance

- 4.1 Following a critical review of the consumption ratio of recycled paper as against virgin paper, follow up action has been taken to reduce the use of virgin paper. The consumption ratio of recycled paper as at 30 April 2007 was 49% which already exceeded the target of 30% set by ETWB Circular Memorandum of 25 July 2006. The ratio of recycled paper has even increased up to 52% by 31 December 2007.
- 4.2 To reduce power consumption, the Department conducted a programme of

replacing the existing light tubes with energy-efficient ones in Queensway Government Offices (QGO) in 2007. Under this programme, over 4 000 pieces of light tubes have been replaced in QGO offices. The outstation offices in Harcourt House (HH) have been refurbished with energy efficient light fittings in March 2007. The electricity consumption of HH has an average significant drop of 20% when compared with the consumption of last year. Furthermore, motion sensors of lighting are installed in the cellular offices of the outstation office in Admiralty Centre in September 2007. This is another device for enhancing energy efficiency.

- 4.3 The office on part of 4/F, High Block, QGO has been successfully registered in the Hong Kong Energy Efficiency Scheme for Buildings for compliance with the Code of Practice for Energy Efficiency of Lighting Installations in September 2007.
- 4.4 A trade-in program of toner cartridge has been arranged with the supplier since July 2004 and a total of 1 311 boxes of empty cartridge were traded-in in 2007.
- 4.5 The Department has switched to use recycled plastic bag since March 2007. Currently, about 90% of plastic bags used by our cleaning contractors are degradable.

5. Our continual commitment

The Department of Justice will continue to adopt effective measures of green management. We will explore new ideas in our continuous endeavor to environmentally responsible use of resources.
