

**The Financial Services and the Treasury Bureau  
(The Treasury Branch)  
Environmental Report 2007**

***Our Environmental Policy***

The Treasury Branch of the Financial Services and the Treasury Bureau (FSTB) is committed to ensuring that our in-house office management is conducted in an environmentally responsible manner. We will regularly review and see continual improvement in our environmental practices based on the principles of *Reduce, Reuse* and *Recycle* in the consumption of materials and minimisation in the consumption of energy.

***Policy Objective for The Treasury Branch, FSTB***

● ***Policy Objective***

Our policy objective is to ensure the prudent management of public finances following the principle of keeping expenditure within the limits of revenues and to foster a fiscal environment conducive to continued economic growth and success. To ensure that our policy objective can be achieved, we endeavour to –

- Ensure that government expenditure grows no faster than the economy over time and ensure that resources available are used cost-effectively in providing quality services that best meet the needs of the community
- Maintain an effective revenue collection and protection system to cover our spending commitments
- Improve Hong Kong's competitiveness and living environment by investing in major infrastructure projects
- Maintain adequate fiscal reserves within established guidelines through prudent management of public finances
- Improve the efficiency, quality and cost-effectiveness of government's central support services
- Ensure Government's estate to be managed cost-effectively and efficiently

- ***Size of Expenditure and Establishment***

- The annual expenditure of the Treasury Branch, FSTB in 2006-07 and 2007-08 was \$168 million and \$170 million respectively. The budget for 2007-08 was 185 million.
- Our staff establishment as at 31 December 2007 stood at 178.
- Our head office is located at the Central Government Offices. Building management is centrally undertaken by the Director of Administration. We operate one outstation office for our Board of Review (Inland Revenue Ordinance) in private premises at Lippo Centre.

### **Special Green Measures in Budgets**

To help improve the air quality in Hong Kong, we have made some fiscal measures as below -

- From 1 December 2007, we have offered a concessionary duty rate of \$0.56 per litre for Euro V diesel for two years. The rate is 50 per cent lower than that for ultra low sulphur diesel. This concession will help to improve Hong Kong's air quality.
- With effect from 1 April 2007, we encourage the use of environment friendly private cars through a 30% reduction in their First Registration Tax, subject to a cap of \$50,000 per vehicle.

### **Green Measure in Procurement Policies**

To promote conservation, we have included in our guidelines for Government procurement the need to, as far as possible and where economically rational, avoid single-use disposal items and to purchase products –

- with improved recyclability, high recycled content, reduced packing and greater durability;
- with greater energy efficiency;
- utilizing clean technology and/or clean fuels;

- which result in reduced water consumption;
- which emit fewer irritating or toxic substances during installation or use; or
- which result in smaller production of toxic substances, or of less toxic substance, upon disposal.

## **Environmental Management of the Branch**

- ***Office Management***

- *Appointment of Green Manager and Green Executives*

We have appointed a Green Manager, currently the Principal Executive Officer (G), to introduce and review initiatives to improve the Branch's environmental performance. We have also established a network of 13 divisional Green Executives to assist the Green Manager to implement, monitor and review the green housekeeping measures in his division/unit.

- *Major Green Housekeeping Measures*

- collection of re-useable paper for drafting and internal communication
- printing on both sides of plain paper
- reusing envelopes and file jackets
- collection of waste paper for recycling
- using old sets of documents for re-circulation
- extensive use of e-mails for communication both within the Treasury Branch, FSTB and with outsiders through the Government Computer Network and Internet
- using electronic database in our Local Area Network instead of hard copies for ready reference
- using green/recycled products, e.g. refills for ball-pens and clutch pencils, recycled paper and environmentally friendly batteries and correction fluid

- trade-in of toner cartridges with the suppliers
  - printing of budget publications on recycled paper, and at the same time taking care to minimise the number of printed copies required.
  - application of energy saving and other waste reduction measures, e.g. equipping suitable electrical appliance with timers and reusing action tags
  - collection of unused stationery from officers for re-distribution
  - arranging regular “black-bag exercises” to dispose of publications and papers that are no longer of use and arrange for collection by recycle companies, so as to provide an environmental friendly office
  - arranging regular vacuum cleaning of the air-conditioning vents to improve air quality of the office
  - encouraging the use of stairs instead of elevators to save electricity as well as to benefit physical health
  - maintaining the room temperature at 25.5°C during summer months
  - avoiding the use of products that contain volatile organic compounds (VOCs)
- *Monitoring of Environmental Performance*
- Our paper consumption in 2007 was 18% lower than that in 2006. We shall continue to monitor paper consumption closely.
  - Informal environmental audits are conducted on a regular basis and reminders issued at intervals to our officers advising them to switch off lighting and electrical appliances and equipment when not in use and on other green measures.
  - Regular checks are conducted to ensure that engines of our departmental vehicles are switched off while waiting in order to avoid emission and to save fuel.
- *Electronic Dissemination of Information*
- We are disseminating the annual Budget Speech and the

Estimates on the Internet to enable easy access by the public and to minimise hard copies.

- All Financial Circulars and Finance Bureau Circular Memoranda are issued to other bureaux and departments electronically to save the use of paper copies.
- We are producing the Annual Estimates in the form of CD ROMs and disseminate the documents on our webpage as further steps to reduce hard copy distribution within the Government.
- We have developed the Annual Estimates Production System to enable Government departments and the Treasury Branch to compile the Estimates of Expenditure electronically.
- Since 2002-03 legislative session, we have been issuing Establishment Subcommittee, Public Works Subcommittee and Finance Committee papers to the Secretariat of the Legislative Council electronically through Internet. Issue of such papers to bureaux and departments has adopted the same practice, with the aim of dispensing with hard copies.
- We have installed digital senders and promoted their use to facilitate transmission and preservation of copies of documents electronically, to save paper consumption.

● ***Promoting Green Culture through Staff Activities***

To enhance awareness of environmental conservation among staff, we organised an outing to Hoi Ha Wan, West Dam and Lion Nature Education Centre in October 2007.

**Clean Air Charter**

To implement the commitment under the Clean Air Charter, we have adopted the following measures in our operations-

- applying energy-saving measures, e.g. using timer for suitable electrical appliances
- encouraging staff to use stairs instead of elevators
- maintaining room temperature at 25.5°C during summer months
- avoiding the use of products that contain volatile organic compounds (VOCs)

- conducting inspections on a regular basis and sending reminders at intervals to our officers, advising them to switch off lighting and electrical appliances and equipment when not in use
- conducting regular checks to ensure that engines of our departmental vehicles are switched off while waiting in order to avoid idling emission and achieve fuel saving

### **Looking Ahead**

Looking ahead, we will continue our green efforts to protect and improve our environment, aiming to achieve a better quality of life for citizens in Hong Kong. We shall strive to provide necessary support to bureaux and departments to work towards this goal, which include implementing the polluters-pay principle to hold them accountable to the source of pollution, and considering fiscal policies to address the need for conservation. For internal management, we shall continue to take advantage of technology and apply it in our work place with a view to preserving nature as well as improving efficiency. We shall monitor closely our environmental performance on paper consumption and use of green products. We also aim to promote green culture and conservation awareness among staff through various training and staff activities.

### **Views and Suggestions**

We welcome your suggestions. Please write to our Green Manager at the Treasury Branch, FSTB, Room 409, Central Government Offices Main Wing, Lower Albert Road, Central, Hong Kong. You may also drop us a note by e-mail at [info@fstb.gov.hk](mailto:info@fstb.gov.hk) or by fax on 2530 5921.
