

## **Implementation of Regulatory Control on Emission from Non-road Mobile Machinery (NRMM)**

Starting from 1 September 2015, all regulated machines offered or exposed for sale or lease for use in Hong Kong must be approved or exempted with proper labels in the prescribed format issued by EPD. Suppliers offer their regulated machines for sale or lease for local use must bear proper labels. As such, suppliers should submit applications for approval or exemption labels of their regulated machines as soonest as possible.

From 1 December 2015, only approved or exempted NRMMs including regulated machines and non-road vehicles with proper labels are allowed to be used in specified activities and locations including construction sites, container terminals and back up facilities, restricted areas of the airport, designated waste disposal facilities and specified processes. The implementation date of use control (i.e. from 1 December 2015) is also applicable to NRMMs leased from suppliers and are being used in specified activities or locations.
