Subject: Public Consultation - The Way Forward for Stage 2 of the Harbour Area Treatment Scheme

2004/07/09 01:07 PM

Dear Sir / Madam,

I would like to see that there are also improvement, sampling or monitoring of the water quality inside the various storm shelters, even some of them do not belong to the Victoria Harbour area, in Hong Kong.

These storm shelters are highly accessible by tourists and residents of Hong Kong, especially during the annual Tuen Ng Festival, and appropriate attention and resources should be given there as well so as to return the water quality of our harbour to a standard commensurate with Hong Kong's status as Asia's World City.

Thank you very much for your attention.

Regards,
Peter Ho
