Subject: Clean Harbour

2004/06/28 01:46 PM

Dear Sir/Madame,

Having read through your website, I fully agree that your option A is the best plan. What does concern me though is that you drop the treated sewage (perhaps after disinfecting it) back in the harbour waters. Is there no other way of using this sewage, perhaps as landfill, or find other alternatives - perhaps it can be compacted into cheap fuel blocks (I don't know what the treated sewage consist of).

Best regards,

Wilma VALENTINE
