Dear sir,

It's such a good laugh to see your new scheme under the mission statement *A clean harbor for HK*.

You know the problem of our harbor is always *man-made*.- All the reclamation projects these years have only proven to me that your (shameful to use *our government*) government doesn't concern the adversed effects on the harbor pollution problem.

Now, your department is wasting our taxpayer's money on another contradictory scheme...why make a fuss to launch this-pseudo scheme when we can actually stop those reclamation toxic waste dumping to our beautiful harbor for years??

Shame on *your government*.

Please don't waste our money under your beautiful name.

Carmen
