Dear sirs,

The water/air pollution in harbour area is phenomenal and extremely worrying.

I live in Hampton Place in Tai Kok Tsui, right in front of the harbour where a number of cargo ships load/unload the goods everyday. You can smell stinky air (pollution from the ships) and garbage floating on the sea, and you can also see the color of the water in that area is dark, as sewage is emittted into this area.

We, together with other resident in Hampton Place complained this to Environment Portection Dept, but no improvement so far.

We are very glad to know the exsistance of HATS. We wish the HATS can cover this area as the pollution in harbour is harmful to people live near the harbour, and it is damaging Hong Kong's image as well.

Look forward to your reply on this.

Thanks!

Richard
