Subject: My reply of cleanharbour of Hong Kong

08/07/2004 02:48

Dear Hong Kong Government,

First of all, I would like to say thank you about your hard working for keeping this city (Hong Kong, my home) which is famous and strong economy, but every single thing does have their own shortcoming. For our home (Hong Kong), air and water pollution is very serious problem for our living and our future of Hong Kong.

Since the project is about clean harbour of Hong Kong this time, I would like to support your idea of the second project for clean harbour. Since our Victoria Harbour is natural harbour. We should spend our time and invest the money to protect her quality as much as we can, otherwise, we will regret in one day for sure. Plus please don't forget that if we didn't have this beautiful Victoria Harbour in Hong Kong area, then we would not have Today's Hong Kong (You should know what I mean). This harbour helps us (Hong Kong citizen) and Hong Kong itself to become international big city and high quality of our living. If we didn't have this harbour, then all other countries (USA, GB, Japan...etc) would not come and do business with us since 100 years ago, if these countries didn't come, then we would not have Today's Hong Kong. Please take this pollution problem seriously.

As we all know, Hong Kong's economy is not going so well in these few years, but Hong Kong government still helping and supporting us a lot such as our education and our living needs, so we should help HK government this time. Plus Victoria Harbour is belong to every single Hong Kong citizen, so we should have our responsibility to protect our harbour. The best way for us to help Hong Kong government, which is increase the "Polluter Pays Principle". Right now, I am going to answer you the question which you asked on cleanharbour website.

Question #1- I totally agree Question #2- I would say Both HATS stage 2A and 2B process together, so it will improve our water quality faster Question #3- Total agree, we should pay what we spend.

Before I finish this email, I would like to beg Hong Kong government put more time and money to improve our water and air quality. I really miss 20 years ago of Hong Kong. It was clean and fresh air.

Wish you the best and I will always support Hong Kong government,

Ken Wong
