Subject: withouta concerted regional effort our water quality will always be risk.

19.08.2004 05:26 PM

to conaultation of hk harbour dept:

Yes, i would love to our home harbour is clear & qualified to swim in the beach. but the Gov use so much the public funds money to clear the sea water projects, i think is does not help much at all!!!

Ture, is the Pearl river delts Guangzhou,shenzhen, is heavy polluting Every day, i saw the near river coast the toxic chemical fertilizer, factory putting the pollute water directly to the river, and the cargo ship leave the rubbish and river water will flowing to h.k. sea.

And china industrial is waster is not control, does't follower Environmental law, only imporving water qualtiy in the harbour area & beyond , h.k. Gov with guangzhen Gov needed as sustainable solution to our sewage problem at water qualtiy.

Even our air poullation still problem in h.k., how much the Goverment is act...?????with gungdong gov lately year. beach water is geting worst, skin infections or other disease will come for everyone to swimming.

i'm not support to use our publis funds to harbour projects, i requesting the h.k.gov with guangdong gov go operating conditions of envionmental air, water, qualtiy sea water, rubbish waste redution of the resourcse recycling , responsibility of the h.k. and guangdong government or the producers but consumers also.
