

Dear Sir,

HATS

I am viewing this problem from an economist view. As the harbor is our most important public asset, it must follow the law of diminishing returns. All of this kind of investment will cause a lot of wasting in value. The proper way is making the project in a private asset form. The HKSAR should put the project became a public listed company which similar to Mass Transit Railway. The loyalty should be set to be 20 years.

Thank you very much for your attention.

Best regards.

Mr. Solomon Wong Chi Ming
