Subject: Cleaning up the Harbor now.

03/08/2004 09:58

To Whom It May Concern:

Are you seeking a solution to cleaning up the Harbor?

We have the product that will turn your harbor into a prestine (clean) site. All pollution from the ships and other boats, as well as from the overflow from the land, can be converted to biomass, CO2 and water. These are the final products of nature's biodegradation process.

We have the product that will accelerate Nature's biodegradation process by many magnatudes.

Contact me and I can direct you to my counterpart in Malaysia. His name is Kevin Lee. The company is ECO Solutions Berhad.

Sincerely,

**Dr. Robert G. Bayless**
