Subject: Solution to Sewage

31/08/2004 10:20

Dear Sirs:

We have the product that can greatly facilitate your program of cleaning up Hong Kong harbour. Our product not only eliminates odors but accelerates nature's biodegradation process by many magnitudes. It is totally environmentally safe for fish, animals and birds. It is used in water and was originally developed to clean up oil spills at sea. But we found that it does much more than our original view.

Respond to this email and we can begin the appropriate dialog to help you accomplish your goal.

Sincerely,

Dr. Robert G. Bayless
